

# DishDrawer™ Dishwashers

3x  
Models available

**World's First**  
With over a decade of manufacturing experience, the world's first drawer dishwasher, designed by Fisher & Paykel for DCS, offers the most ergonomic solution to dishwashing.

**Generous Capacity**  
The DishDrawer™ Wide dishwasher holds nine place settings while the Double DishDrawer™ dishwasher holds 14 in total. A fully adjustable racking system with independently movable racks and folding tines gives flexibility allowing the drawers to hold large items and plates up to 13" in diameter.

**Superior Wash Performance**  
From heavy duty to delicate; the nine wash cycles offer variable wash (or water) pressure combined with the world's first flow-through detergent dispenser. 163°F sanitizing temperature and fan-assisted drying ensure superior results.

**SmartDrive™ Technology**  
The unique, brushless DC motor developed by Fisher & Paykel, incorporates fewer moving parts meaning greater reliability.

**Seamless Integration**  
Enhanced venting, a fully adjustable door and a wireless remote on panel-ready models eliminates the need for an external interface allowing seamless integration with cabinetry.

**Handle Option**  
DCS DishDrawer™ dishwashers come with a choice of two handle profiles—round or square.
