

**Fisher & Paykel at Ideal Home of the Future**

Fisher & Paykel's famous DishDrawer® Wide, CoolDrawer and induction hob have been chosen for the Ideal Home of the Future in Glasgow. These innovative products, already on show at the Ideal Home of the Future in London, are yours to enjoy in Scotland today.

The new 90cm wide dishwasher in a drawer fits 9 place settings and has 9 wash programmes including eco options. Other features include delay start, key lock and child lock, rinse aid indicator and a flexible racking system which accommodates plates up to 315mm. The slide-and-fold tines allow small cups, large mugs or long-stemmed wine glasses to be placed where required. Small items and knives can be secured in clips or the removable cutlery basket.

CoolDrawer is the first multi-temperature cooling drawer worldwide. CoolDrawer can be changed at the touch of a button into a fridge, freezer, pantry, chiller or wine storage. The five temperature settings allow your food to be fresher and better maintain its natural vitamins.

CoolDrawer complements your existing refrigeration and gives you the freedom to place it wherever you want. It is an integrated product but an EZKleen stainless steel design is available. CoolDrawer is easy to install and as easy to open as a kitchen drawer.

Fisher & Paykel

Induction offers fast, efficient and safe cooking through electromagnetic vibrations, which heat your cookware directly rather than indirectly through the glass surface. This cooking technology not only saves time, but is also more energy efficient as no heat is wasted.

Power Boost, Auto Heat Reduce, Gentle Heat, Pan Detection, Auto Spillage Off and Key Lock are a few of the features that make this appliance a must.

Fisher & Paykel Appliances can be found in Scotland through Ashley Ann, Kitchen International, John Lewis, John Taylor stores and many more independent kitchen studios.
