**WARNING!**

Electrical Shock Hazard

**WARNING:** To reduce the risk of electrical shock, fire, or injury to persons, the installer must ensure that the dishwasher is completely unenclosed at the time of installation. Before fitting the front panels and connecting the integrated badges (where present), the installer must ensure that the dishwasher is disconnected from the power supply. After installing the front panels, the installer must ensure that the following components are electrically earthed: the panel bracket, the integrated badge (where present) and any custom metal component (e.g. handle) that extends past the rubber seal. Failure to follow these warnings may result in electrical shock, injury or fire.

1. **REMOVE PANEL BRACKET(S) FROM PRODUCT**

   - Remove side pins and gently pull off the panel bracket slightly.
   - Double Models: Repeat for the other drawer.

2. **DISCONNECT EARTH WIRE & KNOCK-TO-PAUSE MODULE(S)**

   - Disconnect the Earth Wire from the bracket
   - Unplug the knock sensor from the controller.
   - Double Models: Repeat for the other drawer.

3. **REMOVE THE KNOCK-TO-PAUSE MODULE(S)**

   - Remove the Knock-to-Pause module from the back of the bracket.
   - Double Models: Repeat for the other bracket.

4. **ATTACH KNOCK-TO-PAUSE MODULE(S) TO ACCESSORY DOOR(S)**

   - IMPORTANT!
     - Ensure the Knock-To-Pause module is orientated correctly before attaching.

   - Attach the Knock-To-Pause module to the back of the door through the 3 pre-drilled holes cut into the door as shown.
   - Use all 3 fixing screws provided with your DishDrawer.
   - Double Models: Repeat for the other drawer.
5 CONNECT THE KNOCK-TO-PAUSE MODULE(S) TO THE CONTROLLER(S)

Ensure the Knock-To-Pause Module Cable is connected to the UI1 Port.
Double Models: Repeat for the other drawer.

6 RECONNECT THE EARTH WIRE TO THE PANEL BRACKET(S)

- **WARNING!**
  - Electrical Shock Hazard
  - To earth the panel bracket, connect the earth wire from the product to one of the tabs.
  - Any custom metal component (e.g. handle) that extends past the rubber seal must be earthed too.
  - Failure to follow these warnings may result in electrical shock, injury or fire.

Reconnect the Earth Wire to the Panel bracket.

7 ATTACH ACCESSORY DOOR(S) TO PRODUCT

Push the Custom Panel on to the drawer and reinsert the side pins on each side.

Double Models: Repeat for the other drawer.

8 ADJUST CUSTOM PANEL HEIGHT TO ALIGN CABINETRY GAPS

With the doors fitted, insert an appropriately sized Philips screwdriver into the hole above the side pin and rotate the doors up or down to align the gaps in your cabinetry.

- Repeat on the other side if necessary.
- Each door has a maximum travel of 2mm up or down.

**IMPORTANT!**
- Ensure that you maintain a minimum of 2mm ventilation gap below the door.
- Dispose of any packaging/film from door.

**IMPORTANT!**
- Ensure the rubber seal between the drawer and panel is kept in place.
