SAFETY AND WARNINGS

**WARNING!**

**Electrical Shock Hazard**
Before installing the dishwasher, remove the house fuse or open the circuit breaker. If permanently connecting the dishwasher, be sure the power is isolated and the dishwasher unplugged.

**GROUNDING INSTRUCTIONS**
This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances. WARNING - Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly grounded.

If the dishwasher is installed as a permanently connected appliance:
GROUNDING INSTRUCTIONS - This appliance must be connected to a grounded metal, permanent wiring system, or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the appliance.
Do not modify the power supply plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use an extension cord, adapter plug or multiple outlet box. Failure to follow this advice may result in electrical shock or death.

**WARNING!**

Cut Hazard
Take care - panel edges are sharp.
Failure to use caution could result in injury or cuts.

IMPORANT SAFETY INSTRUCTIONS

- Installation of this dishwasher requires basic mechanical and electrical skills.
- Be sure to leave these instructions with the Customer.
- Installation must comply with your local building, electricity, and plumbing regulations.
- At the completion of the dishwasher installation, the Installer must perform the Final Checklist.
- Remove all packaging materials supplied with the dishwasher.
- This dishwasher is manufactured for indoor use only.
- Ensure all water connections are turned OFF. It is the responsibility of the plumber and electrician to ensure that each installation complies with all Codes and Regulations.
- The dishwasher MUST be installed to allow for future removal from the enclosure if service is required.
- The switched power outlet must be outside the dishwasher cavity, so that it is accessible after installation.
- Care should be taken when the appliance is installed or removed to reduce the likelihood of damage to the power supply cord and hoses.
- If the dishwasher is to be relocated from one installation to another it must be kept upright to avoid damage from water spillage.
- Make sure only new hoses are used for connection (supplied with the dishwasher). Old hoses should not be reused.
- Failure to install the dishwasher correctly could invalidate any warranty or liability claims.
- If the product is installed in a motor vehicle, boat or similar mobile facility, you must bring the vehicle, boat or mobile facility containing the product to the service shop at your expense or pay the service technician's travel to the location of the product.
- This dishdrawer is intended for connection to the hot-water supply.

SAVE THESE INSTRUCTIONS

The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, go to our website www.fisherpaykel.com or contact your local Fisher & Paykel dealer.
**PARTS SUPPLIED**

- **Drain hose support (1)**
- **Drain hose joiner (1)**
- **Wire clip (2)** (for securing Drain hose joiner)
- **Clamp (1)** (for securing Drain hose joiner)
- **Side mounting bracket kit (A and B) (2)**
  - **OPTIONAL**
- **Top mounting brackets (2)**
  - **OPTIONAL**
- **Phillips 5/8” (16 mm) screws (9)**
- **Rubber washer for inlet hose (1)** (comes already fitted)
- **Moisture protection tape (1)** (to prevent moisture damage to cabinetry)
- **Hexagonal socket for feet adjustment (2)** (long & short)
- **Prefinished toekick (1)**
- **Edge Protector (1)** (If the services hole is through a metal partition, the hole must be protected with the Edge Protector supplied to prevent damage to the power cord or hoses.)

---

**DishDrawer™ Installation Overview**

This video provides an overview of what is needed to install a DishDrawer™. It is intended as an overview only of the installation process and is not intended to be used as a guide on how to install a DishDrawer™ yourself.

https://vimeo.com/325297597

---

If the Drain hoses supplied are not long enough to reach your services, you must use a Drain Hose Extension Kit P/N 525798 which will extend the drain hoses by 11’ 10” (3.6m).

The kit is available from the nearest Fisher & Paykel Authorized Service Center, or Toll free 1.888.936.7872 or www.fisherpaykel.com
3 A REMOVE THE LOWER DRAWER

To prevent kinked hoses
Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.

Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.

3 B REMOVE THE ACCESS COVER & REMOVE POWER CORD

1 With a flat-bladed screwdriver, push in the clips and slide out the access cover.
2 Unscrew the electronics module cover.
3 Carefully pull out the electronics module and rest on the chassis base out of the way.
4 With a screwdriver, unclip the plastic harness cover and hinge open.
5 Slide the terminal block cover sideways to unlock and hinge open to access the terminal block.
6 Unscrew the Live, Neutral and Earth wires as shown.
7 Unscrew the three screws on the base as shown and remove the cord from the product.
**OPTIONALLY HARD WIRING PRIOR TO INSTALLATION**

**TERMINATE MAINS WIRING AS SHOWN AND REPLACE MODULE AND COVERS**

1. Lift or rotate counter-clockwise the drawer back onto the drawer runners on either side.

2. Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

3. Release tab

4. Pull the release tabs forward on both sides 4" (100 mm). Ensure the tabs are fully pulled forward and click into place.

**IMPORTANT!**

Ensure the mains wires are routed UNDERNEATH all other harness wiring from the electronics module.

- **3.-C**
  - **8** Fit a suitable cable clamp for the conduit through the metal knockout. Ensure wiring is routed through or under housing ribs.
  - **9** Screw down the Live, Neutral and Earth wires correctly.
  - **10** Push the plastic harness cover back over. It should clip back into place.
  - **11** Fold down and slide back the terminal block cover.
  - **12** Refit the electronics module back into position, being careful of wiring.
  - **13** Replace the screw securing the electronics module.
  - **14** Slide the access cover back, ensuring the 2 clips shown are fully locked in place.

**NOTE:** Use copper conductors only.

---

**Minimum clearances from adjacent cabinetry**

- min. 1/2” (13 mm) clearance from a corner cupboard
- min. 1/16” (2 mm) clearance to adjacent cupboard door

---

**Bracket slots**

**PLAN**

**PROFILE**
CAVITY PREPARATION

**Water Connection**
Recommended **HOT**
(Maximum 140°F/60°C).
Supplied hose to suit 3/8” (9 mm) male compression fitting.

**Water Pressure**
- **Water softener models**
  - Max. 1 MPa (145 psi)
  - Min. 0.03 MPa (4.3 psi)
- **Models without water softener**
  - Max. 1 MPa (145 psi)
  - Min. 0.03 MPa (4.3 psi)

**Kosher requirements**
Drains will need to be separated to satisfy kosher requirements.
We suggest you confirm acceptability with your local rabbi in respect to kosher installations.

**IMPORTANT!**
The power outlet must be located in a cabinet adjacent to the dishwasher cavity. 110-120 VAC max. 15 A

**Service Holes**
Can be located either side of dishwasher, close to the rear face and the floor, as illustrated, for access to the water supply, drain and power outlet. The small hole is for the power cord only.

- If the hole is through wood, make sure its edges are smooth and rounded.
- If the hole is through metal, ensure you fit the supplied Edge Protector to prevent damage to the power cord.

**WARNING!**
Incorrect placement of the hole will result in damage to hoses.
MAXIMUM DISTANCE OF HOSES & CORD FROM CHASSIS EDGE

LEFT HAND SIDE
- Drain hoses - 78 1/2" (2000 mm)
- Inlet hose - 64 3/4" (1650 mm)
- Power cord (excl.plug) - 29 1/2" (750 mm)

RIGHT HAND SIDE
- Drain hoses - 70 1/2" (1800 mm)
- Inlet hose - 49" (1250 mm)
- Power cord (excl.plug) - 27 1/2" (700 mm)
NOW CHOOSE WHICH INSTALLATION METHOD (A) OR (B) IS MORE SUITABLE FOR YOUR CABINETRY...

8 RECOMMENDED METHOD (A) - SECURE WITHOUT DRAWER REMOVAL (FRAMELESS CABINETRY ONLY)

9 - A ATTACH SIDE MOUNTING BRACKETS

Clip all four side mounting brackets into their slots using a flat-bladed screwdriver. Ensure they’re securely fitted before sliding product into cavity.

The mounting slots are in pairs, one on each side diagonally across the product. A bracket must match A slot and B bracket must match B slot.

10 - A PULL THROUGH HOSES & PUSH INTO THE CAVITY

As you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

You can raise or lower the product by twisting the feet. Then take care when pushing the product into the cavity that you do not bend the feet.

Initially level the product.

optionally attach the two top mounting brackets (x2)
11 - A SECURE TO THE CABINETRY ON THE SIDES

Open the drawer halfway. Using a flat bladed screwdriver, prise the gray rubber plug out of the trim moulding.

Replace the gray rubber plug back into the trim moulding and ensure the trim seal is facing forward.

Repeat for all four brackets.

Using a small Philips screwdriver, screw through the trim moulding, securing the side mounting bracket to the cabinetry. Do not damage the rubber trimseal.

12 - A OPTIONALLY SECURE TO THE CABINETRY ABOVE

The top mounting brackets will only bend upwards a maximum of 3/8” (10 mm).

13 - A FIT THE SUPPLIED TOEKICK PANEL

Where the toekick meets the bottom of the tub is the cut-off point.

Lay the toekick face down on a chopping board or similar.

Turn the toekick over and score along the same line.

Smooth the edge with a file. Be careful of sharp edges.

Score along the marked cutoff line with a knife.

Gently snap off the excess.

Snap off the two end tabs.

Slide the toekick onto the mounting rails either side and screw the toekick onto the bottom of tub on either side.

Mounting rail

IMPORTANT! Do not overtighten screw.

Mark this point on the toekick with a pencil.
**ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL**

**9 - B  PULL THROUGH HOSES & PUSH INTO THE CAVITY**

- Optionally attach the two top mounting brackets (x2)
- Initially level the product
- You can raise or lower the product by twisting the feet. Then take care when pushing the product into the cavity that you do not bend the feet.
- As you push product in, pull through hoses and cord, ensuring they don't get kinked or twisted.

**10 - B  REMOVE THE LOWER DRAWER**

- To prevent kinked hoses
  - Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.
- Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.
- Rotate the drawer clockwise (max. 90°) and rest on side.
- Sit the drawer down
- Push drawer runners back in on either side.
SECURE TO THE CABINETRY ON THE SIDES

For further adjustment, using the most appropriate length Hexagonal socket supplied, fully extend leveling feet up to required distance by hand.

Secure using two pairs of formed brackets (use 5/8” (16 mm) screws). Repeat on the other side of the chassis.

OPTIONALLY SECURE TO THE CABINETRY ABOVE

The top mounting brackets will only bend upwards a maximum of 3/8” (10 mm).

REFIT THE DRAWER ONTO THE RUNNERS

Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

Lift or rotate counter-clockwise the drawer back onto the drawer runners on either side.

Pull the release tabs forward on both sides 4” (100 mm). Ensure the tabs are fully pulled forward and click into place.
**FIT THE SUPPLIED TOEKICK PANEL**

**1.** Where the toekick meets the bottom of the tub is the cut-off point.

**2.** Mark this point on the toekick with a pencil.

**3.** Lay the toekick face down on a chopping board or similar.

**4.** Score along the marked cutoff line with a knife.

**5.** Turn the toekick over and score along the same line.

**6.** Gently snap off the excess.

**7.** Smooth the edges with a file. Be careful of sharp edges.

**8.** Snap off the two end tabs.

**9.** Slide the toekick onto the mounting rails either side and screw the toekick onto the bottom of tub on either side.

**IMPORTANT!**
Do not overtighten screw.
THERE ARE THREE DIFFERENT PLUMBING AND DRAINAGE OPTIONS. CHOOSE WHICH IS MORE SUITABLE.

DRAINAGE OPTION 1
Dishwasher and Ø 1 1/2" (38 mm) Standpipe

Screw Drain hose support to back wall at correct height.

If space is limited for fixing, push hose through drain hose support to required height.

IMPORTANT!
Ensure that drain hose is installed as close to the underside of the benchtop as possible. This will ensure no waste re-enters the drain hose in the event of poor flow or a blockage in the plumbing.

Ensure the drain hose does not extend into water retained in the trap; an air gap is required to prevent waste water from siphoning back into the tub.

IMPORTANT!
Ensure that drain connection will comply with local plumbing regulations.
DRAINAGE OPTION 2
Dishwasher using Dual Air Gap/Break with Drain Hose Joiner

IMPORTANT!
Ensure that drain connection will comply with local plumbing regulations.

We recommend the use of a commercially available Dual (Double) Air Gap/Break Kit. This provides totally separate draining for each drawer and eliminates possible “cross draining” problems.

Secure both drain hoses to a Dual Air Gap/Break

37 3/8” (950 mm) Max. height to top of Air Break (countertop or wall mounted)
IMPORTANT!
Ensure that drain connection will comply with local plumbing regulations.

DRAINAGE OPTION 3
Dishwasher using drain hose joiner onto sink trap/waste tee

1. Screw Drain hose support to back wall at correct height.
   If space is limited for fixing, push hose through drain hose support to required height.

2. Supplied drain hose joiner to suit Ø 3/4" (19 mm) waste tee

3. Ensure drain hose is routed straight to the joiner so that waste water does not accumulate in the hose. Remove excess drain hose material if necessary. Do not shorten the inlet hose.

min. 19 1/16" (500 mm)
min. R 8" (200 mm)
29 1/2 - 34 3/4" (750-883 mm)
29 1/2 - 34 3/4" (750-883 mm)
1. Ensure the supplied rubber washer is fitted inside the coupling.

2. Tighten coupling with spanner.

Excessive water remaining above the filter plate, after the rinse cycle. (This is displayed as an R3 fault)
Check for a kinked drain hose, blocked waste connection, highloop not properly installed, drain hose not routed correctly or spray arms not in place.

No water supply. (This is displayed as an R1 fault)
Check water is connected and turned on.

The dishwasher is beeping continuously
There is a fault. See section ‘If there is a fault’ in the User guide for further information and instructions.

No program indicator lights up when the drawer is opened
Ensure power is connected and is switched on. If it is and still no indicator lights up, see the ‘Preference options’ section of the ‘Quick start guide’. An option called ‘Open drawer auto power-on’ may need to be turned on.

Water around water supply and drainage connections
Check connections, existing plumbing and hoses for leaks. Check rubber washer and hose clamp are correctly fitted.

If product is tipping
Ensure the product is secured to the cabinetry.

If front panels are misaligned
Check and relevel product. Check the cabinetry is square. For Integrated models, check and adjust front panel alignment if necessary.

Drawer doesn’t close properly
Ensure nothing is obstructing the drawer from closing properly eg hoses or drawer latches.

If a problem occurs, consult the ‘Troubleshooting’ section of the User guide.

If after checking these points you still need assistance, please refer to the Service & Warranty book for warranty details and your nearest Authorized Service Center, or contact us through our website, listed below.
TO BE COMPLETED BY THE INSTALLER

☐ Check all parts are installed.
☐ Ensure that all panels and parts thereof are secure and final electrical tests have been conducted in accordance with local electrical regulations.
☐ Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The drawers must be free to fully close with no resistance from the cabinetry.
☐ Ensure inlet hose to water supply has supplied rubber washer fitted, and that it’s tightened a further half turn after seal contact.
☐ Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.
☐ The drain hose joiner must not support the weight of excess hose material. Keep drain hose as fully extended as possible to prevent sagging. Any excess length of drain hose should be kept on the dishwasher side of the highloop.
☐ If connecting the drain hose to the sink trap, ensure the Highloop is a minimum 150 mm higher than the drain hose joiner.
☐ Ensure any packaging or tape securing the racks or spray arms is removed from the drawers.
☐ Water softener models only: adjust the water softener setting from the default setting to suit the water hardness of the area. See the Quick start guide and section ‘Water softener’ in the User guide.

☐ Turn on the power and water supplies, then open the drawers. You should hear a beep and see a program indicator light up on the internal control panel.
☐ Check the spray arms are in place, mounted correctly and free to rotate, by physically rotating by hand.
☐ Add three cups of water into the drawer. Press ➤ until the indicator of the ‘Rinse’ program lights up. Close the drawer and press ⏩ to start the program. Repeat for the other drawer.
☐ After the Rinse program has finished, ensure the dishwasher has run and drained correctly.
☐ Check the water supply has correctly shut off and drainage connection for leakage.

SAFETY AND WARNINGS

IMPORTANT SAFETY INSTRUCTIONS

- Installation of this dishwasher requires basic mechanical and electrical skills.
- Be sure to leave these instructions with the Customer.
- Installation must comply with your local building, electricity, and plumbing regulations.
- At the completion of the dishwasher installation, the Installer must perform the Final Checklist.
- Remove all packaging materials supplied with the dishwasher.
- This dishwasher is manufactured for indoor use only.
- Ensure all water connections are turned OFF. It is the responsibility of the plumber and electrician to ensure that each installation complies with all Codes and Regulations.
- The dishwasher MUST be installed to allow for future removal from the enclosure if service is required.
- The switched power outlet must be outside the dishwasher cavity, so that it is accessible after installation.
- Care should be taken when the appliance is installed or removed to reduce the likelihood of damage to the power supply cord and hoses.
- If the dishwasher is to be relocated from one installation to another it must be kept upright to avoid damage from water spillage.
- Make sure only new hoses are used for connection (supplied with the dishwasher). Old hoses should not be reused.
- Failure to install the dishwasher correctly could invalidate any warranty or liability claims.
- If the product is installed in a motor vehicle, boat or similar mobile facility, you must bring the vehicle, boat or mobile facility containing the product to the service shop at your expense or pay the service technician’s travel to the location of the product.
- This dishdrawer is intended for connection to the hot-water supply.

WARNING!

Electrical Shock Hazard
Before installing the dishwasher, remove the house fuse or open the circuit breaker. If permanently connecting the dishwasher, be sure the power is isolated and the dishwasher unplugged.

GROUNDING INSTRUCTIONS
This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances. WARNING - Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly grounded.

If the dishwasher is installed as a permanently connected appliance: GROUNDING INSTRUCTIONS - This appliance must be connected to a grounded metal, permanent wiring system, or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the appliance.
Do not modify the power supply plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use an extension cord, adapter plug or multiple outlet box.
Failure to follow this advice may result in electrical shock or death.

WARNING!

Cut Hazard
Take care - panel edges are sharp.
Failure to use caution could result in injury or cuts.

IMPORTANT!
SAVE THESE INSTRUCTIONS
The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please go to our website www.fisherpaykel.com or contact your local Fisher & Paykel dealer.
If the Drain hoses supplied are not long enough to reach your services, you must use a Drain Hose Extension Kit P/N 525798 which will extend the drain hoses by 3.6 m. The kit is available from the nearest Fisher & Paykel Authorized Service Center or our local website listed at the end of this document.
OPTIONALLY HARD WIRING PRIOR TO INSTALLATION

3-A REMOVE THE DRAWER

To prevent kinked hoses
Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.

Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.

1  With a flat-bladed screwdriver, push in the clips and slide out the access cover.
2  Unscrew the electronics module cover.
3  Carefully pull out the electronics module and rest on the chassis base out of the way.
4  With a screwdriver, unclip the plastic harness cover and hinge open.
5  Slide the terminal block cover sideways to unlock and hinge open to access the terminal block.
6  Unscrew the Live, Neutral and Earth wires as shown.
7  Unscrew the three screws on the base as shown and remove the cord from the product.

3-B REMOVE THE ACCESS COVER & REMOVE POWER CORD

Push drawer runners back in on either side.

Sit the drawer down

1  Clip

Access cover

2  Electronics module

3  Terminal block cover

4  Remove existing power cord

5  Rotate the drawer clockwise (max. 90°) and rest on side.

Minimum clearances from adjacent cabinetry:
- min. 1/2" (13 mm) clearance from a corner cupboard
- min. 1/16" (2 mm) clearance to adjacent cupboard door

Cavity height options allow you to match dishwasher with your cabinetry or companion products.
CAVITY PREPARATION

**Water Connection**

- **Recommended HOT**
  Maximum 140°F/60°C.
- Supplied hose to suit 3/8" (9 mm) male compression fitting.

**Water Pressure**

- **Water softener models**
  - Max. 1 MPa (145 psi)
  - Min. 0.1 MPa (14.5 psi)
- **Models without water softener**
  - Max. 1 MPa (145 psi)
  - Min. 0.03 MPa (4.3 psi)

**IMPORTANT!**

- The power outlet must be located in a cabinet adjacent to the dishwasher cavity.
- 110-120 VAC max. 15 A

---

**Service Holes**

- Can be located either side of dishwasher, close to the rear face and the shelf, as illustrated.
  - **If the hole is through wood**, make sure its edges are smooth and rounded.
  - **If the hole is through metal**, ensure you fit the supplied Edge Protector to prevent damage to the power cord.

---

**WARNING!**

Incorrect placement of the hole will result in damage to hoses.

- **Max 1/4" (5 mm)**
  - Max distance between hole edge and rear inner face
- **Max 1/2" (10 mm)**
  - Max distance between hole edge and shelf

---

**COUNTERTOP**

- **3/8" (10 mm)**
  - Moisture protection tape must be applied

---

- **Ø max. 1 1/2" (38 mm)**
  - max. 17 11/16" (450 mm)

---

- **Min. 7 7/8" (200 mm)**

---

- **If there is no side partition**, you can construct timber bracing as something to secure into.
- **If the hole is through wood**, make sure its edges are smooth and rounded.
- **If the hole is through metal**, ensure you fit the supplied Edge Protector to prevent damage to the power cord.
MAXIMUM DISTANCE OF HOSES & CORD FROM CHASSIS EDGE

LEFT HAND SIDE
- Drain hose - 78 1/2" (2000 mm)
- Inlet hose - 64 3/4" (1650 mm)
- Power cord (excl.plug) - 78 1/2" (2000 mm)

RIGHT HAND SIDE
- Drain hose - 70 1/2" (1800 mm)
- Inlet hose - 49" (1250 mm)
- Power cord (excl.plug) - 78 1/2" (2000 mm)
NOW CHOOSE WHICH INSTALLATION METHOD (A) OR (B) IS MORE SUITABLE FOR YOUR CABINETRY...

8 RECOMMENDED METHOD (A) - SECURE WITHOUT DRAWER REMOVAL (FRAMELESS CABINETRY ONLY)

As you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

IMPORTANT!
If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.

9-ATTACH SIDE MOUNTING BRACKETS
Clip all four side mounting brackets into their slots using a flat-bladed screwdriver. Ensure they’re securely fitted before sliding product into cavity.

10-PULL THROUGH HOSES & PUSH INTO THE CAVITY

The mounting slots are in pairs, one on each side diagonally across the product. A bracket must match A slot and B bracket must match B slot.

When fitting brackets, ensure the ends are not pushed down into the chassis.
1. Open the drawer halfway. Using a flat bladed screwdriver, prise the grey rubber plug out of the trim moulding.

2. Using a small Philips screwdriver, screw through the trim moulding, securing the side mounting bracket to the cabinetry. Do not damage the rubber trimseal.

3. Replace the grey rubber plug back into the trim moulding and ensure the trim seal is facing forward.

Repeat for all four brackets.
ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL

9-8 PULL THROUGH HOSES & PUSH INTO THE CAVITY

As you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

IMPORTANT!
If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.

10-8 REMOVE THE LOWER DRAWER

To prevent kinked hoses
Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.

Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.

Push drawer runners back in on either side.

Sit the drawer down

Press drawer runners back in on either side.

Rotate the drawer clockwise (max. 90°) and rest on side.
Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

The product has three pairs of fixing points:

1. Two pairs of formed brackets on either side of the chassis (use 5/8" (16mm) screws)
2. A pair of fixing holes either side on the bottom (use 1 1/2" (38mm) fixing screws & washers)
3. Two pairs of formed brackets on either side of the chassis (use 5/8" (16mm) screws)

Ensure the sound insulation is repositioned correctly.

Lift or rotate anti-clockwise the drawer back onto the drawer runners on either side.

Pull the release tabs forward on both sides 4" (100mm). Ensure the tabs are fully pulled forward and click into place.
THERE ARE THREE DIFFERENT PLUMBING AND DRAINAGE OPTIONS. CHOOSE WHICH IS MORE SUITABLE.

DRAINAGE OPTION 1
Dishwasher and Ø 1 1/2" (38 mm) Standpipe

Screw Drain hose support to back wall at correct height.

If space is limited for fixing, push hose through drain hose support to required height.

**IMPORTANT!**
Ensure that drain hose is installed as close to the underside of the benchtop as possible. This will ensure no waste re-enters the drain hose in the event of poor flow or a blockage in the plumbing.

Ensure the drain hose does not extend into water retained in the trap; an air gap is required to prevent waste water from siphoning back into the tub.

**IMPORTANT!**
Ensure that drain connection will comply with local plumbing regulations.
IMPORTANT! Ensure that drain connection will comply with local plumbing regulations.

DRAINAGE OPTION 2
Dishwasher using Air Break with Drain Hose Joiner

1. Secure drain hose to drain hose joiner and secure to Air Break

2. Min. R 8” (200mm)

37 3/8” (950mm)
Max. height to top of Air Break (countertop or wall mounted)
DRAINAGE OPTION 3
Dishwasher using drain hose joiner onto sink trap/waste tee

1. Screw Drain hose support to back wall at correct height.
2. If space is limited for fixing, push hose through drain hose support to required height.
3. Supplied drain hose joiner to suit Ø 3/4" (19 mm) waste tee

IMPORTANT!
Ensure that drain connection will comply with local plumbing regulations.

Ensure drain hose is routed straight to the joiner so that waste water does not accumulate in the hose. Remove excess drain hose material if necessary. **Do not shorten the inlet hose.**
1 Ensure the supplied rubber washer is fitted inside the coupling.

2 Tighten coupling with spanner.

180° No leaks!
• **Excessive water remaining above the filter plate, after the rinse cycle.** (This is displayed as an R3 fault)
  Check for a kinked drain hose, blocked waste connection, highloop not properly installed, drain hose not routed correctly or spray arms not in place.

• **No water supply** (This is displayed as an R1 fault)
  Check water is connected and turned on.

• **The dishwasher is beeping continuously**
  There is a fault. See section 'If there is a fault' in the User guide for further information and instructions.

• **No program indicator lights up when the drawer is opened**
  Ensure power is connected and is switched on. If it is and still no indicator lights up, see the ‘Preference options’ section of the ‘Quick start guide’. An option called ‘Open drawer auto power-on’ may need to be turned on.

• **Water around water supply and drainage connections**
  Check connections, existing plumbing and hoses for leaks. Check rubber washer and hose clamp are correctly fitted.

• **If product is tipping**
  Ensure the product is secured to the cabinetry.

• **Drawer doesn’t close properly**
  Ensure nothing is obstructing the drawer from closing properly eg hoses or drawer latches.

• **If a problem occurs,** consult the ‘Troubleshooting’ section of the User guide.

• **If after checking these points you still need assistance,** please refer to the Service & Warranty book for warranty details and your nearest Authorized Service Center, or contact us through our website, listed below.
**FINAL CHECKLIST**

**TO BE COMPLETED BY THE INSTALLER**

☐ Check all parts are installed.

☐ Ensure that all panels and parts thereof are secure and final electrical tests have been conducted in accordance with local electrical regulations.

☐ Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The drawers must be free to fully close with no resistance from the cabinetry.

☐ Ensure inlet hose to water supply has supplied rubber washer fitted, and that it’s tightened a further half turn after seal contact.

☐ Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.

☐ The drain hose joiner must not support the weight of excess hose material. Keep drain hose as fully extended as possible to prevent sagging. Any excess length of drain hose should be kept on the dishwasher side of the highloop.

☐ If connecting the drain hose to the sink trap, ensure the Highloop is a minimum 150 mm higher than the drain hose joiner.

☐ Ensure any packaging or tape securing the racks or spray arms is removed from the drawers.

☐ Water softener models only: adjust the water softener setting from the default setting to suit the water hardness of the area. See the Quick start guide and section ‘Water softener’ in the User guide.

☐ Turn on the power and water supplies, then open the drawer. You should hear a beep and see a program indicator light up on the control panel.

☐ Check the spray arm is in place, mounted correctly and free to rotate, by physically rotating by hand.

☐ Add three cups of water into the drawer. Press until the indicator of the ‘Rinse’ program lights up. Close the drawer and press to start the program.

☐ After the Rinse program has finished, ensure the dishwasher has run and drained correctly.

☐ Check the water supply has correctly shut off and drainage connection for leakage.

Complete and keep for safe reference:
