① SAFETY AND WARNINGS

⚠ WARNING!

Electrical hazard

Before installing the DishDrawer®, remove the house fuse or open the circuit breaker.

If permanently connecting the DishDrawer®, be sure the power is isolated and the DishDrawer® unplugged.

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances. Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly grounded.

Do not modify the power supply plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use an extension cord, adapter plug or multiple outlet box.

Failure to do so may result in electrical shock or death.

⚠ WARNING!

Cut hazard

Take care - panel edges are sharp.

Failure to use caution could result in injury or cuts.

12 FINAL CHECKLIST

- ✓
- ☐ Check all parts are installed.
- ☐ Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The DishDrawer® must be free to fully close with no resistance from the cabinetry.
- ☐ Ensure inlet hose to water supply has rubber washer fitted and is tightened a further half turn after seal contact.
- ☐ Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.
- ☐ The drain hose joiner must not support the weight of excess hoses. Keep hoses as fully extended as possible to prevent sagging. Any excess length of hose should be kept on the dishwasher side of the high loop.
- ☐ If using Plumbing and Drainage OPTION 1, ensure the Highloop is a minimum 6" (150 mm) higher than the drain hose joiner.
- ☐ Turn on the power and water supply. Then press the power button to turn the DishDrawer® on. The DishDrawer® should beep and Wash Programme lights light up.
- ☐ Check the spray arm(s) are in place and free to rotate.

- ☐ Add three cups of water into the DishDrawer®. On the Wash Programme Selector Panel press Rinse and close the drawer(s). Start the programme by pressing the Start/Pause button.
- ☐ After the Rinse programme has finished, ensure machine has run and drained correctly.
- ☐ Check water supply and drainage connection for leakage.

Repeat for each Drawer.
