

Front Loader Washing Machine, 12kg

With room for large loads, this front loader has a cycle for any kind of load, from delicates to bulky items.

- With 13 wash cycles including a 30 minute Quick cycle to cater to busy lives
- SmartDrive™ technology delivers a gentle, quiet and reliable wash
- Add a Garment function allows you to add items mid cycle
- 4.5 star water and energy rating

DIMENSIONS

Height 850 mm

Width 600 mm
Depth 665 mm

FEATURES & BENEFITS

13 FABRIC CARE CYCLES

With 13 fabric care cycles including Quick, Bulky and Handwash. The specially-designed cushioned drum provides a gentle, effective washing action, protecting clothes while delivering an optimal wash performance.

SMARTDRIVE™ TECHNOLOGY

SmartDrive™ Technology is a gentle, quiet, and efficient combination of smart electronics and a direct drive motor that senses the load, to deliver better fabric care.

Quick Cycles

When time is short, you can select a quick 30 minute wash without compromising cleaning and fabric care. Vortex Wash allows most cycles to take less than 1 hour to complete. Water is forced from the bottom of the drum, so detergent and heat reach your clothes faster, cleaning quickly and avoiding over-washing.

Wash larger loads

The large 12kg drum can wash both small and large loads as well as bulky items like a king size feather doona. The wide door opening makes it easy to load and unload. Large capacity is time saving, as a full week's laundry can be done in just a few loads. Accurate water level sensing makes it highly efficient at washing different load sizes.

ADD A GARMENT

Clearly labelled compartments make it easy to see where to put washing powder and softener. It is cleverly shaped to minimise spills and is easy to remove and clean.

DESIGNED TO MATCH

The complete package for a beautiful laundry. The 12kg washing machine is designed to match our 9kg Heat Pump Condensing Dryer. With outstanding aesthetics and complementary wash and dry cycles, they become the perfect pair to deliver complete fabric care.

Flood protection	•	Customise cycle	•	All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.		
Hot and cold water inlets	•	Delicate	•			
Pre Wash	•	Drum Clean	•			
Progress indicator	•	Easy Iron	•	Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
