

# 30" Series 9 Integrated Vacuum Drawer

Integrated

<b>Height</b>	<b>10 11/16 "</b>
<b>Width</b>	<b>29 7/8 "</b>
<b>Depth</b>	<b>22 5/16 "</b>

## FEATURES & BENEFITS

### PRESERVE FRESHNESS

Vacuum sealing removes excess air to create the ideal environment for longer-lasting freshness. By reducing air exposure, it helps prevent bacteria growth and freezer burn, keeping flavours and textures intact. Food-grade, BPA-free bags offer a safe and reusable storage solution.

### EFFORTLESS SOUS VIDE PREPARATION

Enhance flavor and texture with vacuum sealing that locks in marinades, natural juices, and nutrients. Create perfectly sealed portions ready for precise sous vide cooking, ensuring consistently tender and flavorful results.

### THREE LEVELS OF SEALING

Choose from three levels of vacuum sealing to suit a variety of foods, from delicate items such as soft fruits and herbs to hearty cuts of meat.

### PERFECT WINE PRESERVATION

Keep your wine tasting at its best with a simple vacuum seal. Using the included tube, adapters and stopper, air is gently removed to preserve flavor and aroma, so every pour stays fresh and perfectly balanced.

### EASY TO CLEAN

The stainless steel interior is designed for simple maintenance and can be easily wiped clean with a damp cloth.

### DESIGNED TO MATCH

Designed to blend seamlessly into any space, this Vacuum Drawer features a panel-ready finish. Able to be built in almost anywhere, our companion products are crafted to align beautifully and install at the height that best suits your kitchen and lifestyle.

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
