

60cm Series 9 Minimal Handleless Compact Combi- Microwave Oven

Minimal

Combine microwave speed with convection versatility in a compact model. Its sleek handleless design ensures a perfect pairing with your kitchen aesthetic.

- Handleless oven design ensures smooth, uninterrupted lines in your kitchen cabinetry for a cohesive look
- Combi microwave versatility for quick, even heating across a variety of dishes, ensuring perfect interior cooking with crisp exteriors
- Generous 49L capacity, with four shelf positions
- A Wired Temperature Sensor precisely monitors cooking in real time

DIMENSIONS

Height	458 mm
Width	596 mm
Depth	565 mm

FEATURES & BENEFITS

Handleless Design
Effortlessly open and close your oven with a gentle press of a button, ensuring convenience and smooth operation in the kitchen. Moving away from traditional oven doors, this model is an ideal match for kitchens with a continuous, handle-free design, ensuring a seamless flow across the cabinetry.

Cooking Flexibility
Select from 22 functions: four dedicated to microwave-only, 14 designed for traditional oven cooking, and four combination functions that harness the best of both microwave and convection oven technology.

Cook With Confidence
The 5” screen provides an intuitive guided cooking experience that helps to deliver perfect results, whether you’ve been cooking all your life or are just starting out.

Sized To Suit
The compact height of this microwave oven allows for versatile placement. All our companion products can be installed at a convenient height to suit your kitchen design and preference.

Safe And Sound
The CoolTouch door is safe to touch from the outside, protecting your hands and the surrounding cabinetry.

Complementary Design
With a sleek black glass finish, this Minimal style oven blends seamlessly, enhancing your kitchen design without dominating it. It’s understated and elegant, whether on its own or as part of a matching appliance set.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
