

# 48" Series 9 6 Burner + Griddle Gas Rangetop, LPG

Professional

A powerful six burner rangetop with Professional styling and the additional cooking flexibility of a stainless steel griddle.

- Your burners can deliver anything from a high 19,000 BTU heat per burner for fast boiling, to a gentle flame for simmering
- The stainless steel griddle is great for cooking anything from pancakes to bacon, grilled cheese to quesadillas

## DIMENSIONS

|        |          |
|--------|----------|
| Height | 8 5/16 " |
| Width  | 47 7/8 " |
| Depth  | 28 "     |

## FEATURES & BENEFITS

**Perfect Heat**  
Sealed Dual Flow Burners™ deliver rangetop power up to 23,500 BTU (NG models) for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.

**Precise Control**  
From the highest to the lowest temperatures you get total control with halo-illuminated rangetop dials. A precise full surface simmer is delivered across all burners.

**Cooking Flexibility**  
The continuous surface grates are designed for pots and pans to move safely across the rangetop. Heavyweight stainless steel griddles can be set to desired temperatures and then maintained evenly across the entire griddle surface.

**Easy Cleaning**  
These rangetops have sealed burners and a single sheet cooking surface which, combined with a commercial-style stainless steel finish and dishwasher-safe grates, allow easy cleaning.

**Information At A Glance**  
LED halo control dials provide information at a glance and assist in alerting you if any burners are accidentally left on.

**Complementary Design**  
Built to last with distinctive, bold styling, this rangetop is designed to match the Fisher & Paykel Professional style family of appliances.

## SPECIFICATIONS

|                       |          |

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
