

9kg Series 5 Top Loader Washer, UV Sanitise

- This top loader is easy-to-load and has a specially designed pillow drum for gentle wash action to help you take better care of your clothes.
- Specialised UV Sanitise wash modifier to kill more than 99.99% of bacteria*
 - Auto load sensing uses just the right amount of water for best wash results
 - Impressive 4.5 star energy and 4 star water rating
 - Pillow drum design is gentle on clothes while a low profile agitator helps minimise tangling.
 - Eco wash option reduces energy and water consumption for a more optimised wash

DIMENSIONS

Height	1020 mm
Width	580 mm
Depth	600 mm

FEATURES & BENEFITS

Auto Load Sensing

Intelligent sensors determine load size and soil level before using just the right amount of water for best wash results and optimal fabric care.

Star-Rated Energy And Water

This top loader washing machine boasts a 4.5-star energy rating and a 4-star water rating.

Efficient Water And Energy Usage

The Eco wash option uses less energy and water during a wash cycle making this top loader a great eco-friendly option. A bionic lint filter helps prevent lint, fibres and other debris going back into grey water, for more efficient cleaning and rinse cycles.

Easy To Use

This machine has a cycle to suit every type of load including Bulky, Extra Care and Wool. Select a cycle with the easy to use SmartTouch™ control dial.

Soft-Close Lid

The tough glass lid delivers quality and durability. Its soft close mechanism makes it family safe, avoids slamming and allows for hands-free operation.

Easy Installation

Self-levelling feet make installation easy and ensure the washer stays level, to reduce vibration and keep noise to a minimum.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
