

Series 7 Contemporary Dishwasher

Contemporary

Designed to adapt to every load, this 42dbA rated dishwasher combines a Triple Wash System, Auto Cycle sensing and AutoDry+ technology to deliver precise cleaning and drying performance. Variable wash pressure, independent spray arms and flexible loading features, including stemware grippers and adjustable tines, provide exceptional care for everything from delicate glassware to heavily soiled cookware.

- Quiet 42dbA noise rating, ideal for open plan kitchens
- AutoDry+ automatically opens the door and a fan circulates air at the end of a cycle for better drying
- Flexible racking and Triple Wash System for perfect results in every wash

- Connect via Wi-Fi and the SmartHQ™ app for remote control and notifications
- For added peace of mind, Aqua Stop automatically shuts off the water if a leak is detected

DIMENSIONS

Height	850 - 895 mm
Width	597 mm
Depth	600 mm

FEATURES & BENEFITS

80 Years of Clean Dishes

We have spent 80 years obsessing over the science of clean dishes, meticulously calibrating time, temperature, water movement and chemistry to deliver perfect results. That expertise is what powers Auto Cycle, which uses sensors to detect how dirty the load is, intelligently adjusting wash conditions for consistent cleaning performance and efficient use of resources, wash after wash.

Engineered for Life

Trust is earned over time through consistent results. That's why our team of scientists test wash performance using over 100,000 pieces of cutlery and crockery each year. By carefully analysing soil removal, water and energy consumption, we continuously refine our cycles to deliver proven consistency, wash after wash, transforming dishwashing routines into rituals.

Triple Wash System

The rule of thirds is a principle of balance in design, where three elements work together to create harmony. Inspired by this, our Triple Wash System brings together three racks, three independent spray arms and three-stage filtration to work harmoniously inside the dishwasher. With balanced coverage across every level, the result is consistent cleaning performance in every load.

Ultimate Flexibility

No two days in the kitchen are the same, so your dishwasher should adapt with ease. A flexible cutlery tray keeps utensils neatly separated, while the height-adjustable middle basket creates extra room for tall dishes or bulky cookware. Cup racks with stemware grippers help protect delicate glassware, and foldable supports create the flexibility to accommodate everything from deep pots to oven trays.

Quiet and Considered

Open-plan kitchens call for appliances that work quietly and beautifully. With a very low 42dBA noise rating, this dishwasher is designed to operate with minimal noise and not disrupt your household. For better visibility when loading or unloading, internal LED lighting provides gentle illumination inside, making contents easy to see at a glance.

Custom Cycle Selection

Each load requires a delicate balance. Variable wash pressure and independent spray arms work together to deliver targeted cleaning performance, adapting water flow and force to suit everything from delicate glassware to heavily soiled cookware. Intensive, Half Load, Sanitise and Dry+ modifiers allow each cycle to be further refined for precise cleaning and drying results across every load.

Exceptional Drying Performance

Clean dishes are the result of more than just the wash, with drying a crucial final step in the process. AutoDry+ automatically opens the door and uses a fan to circulate air at the end of the cycle, releasing steam to support more effective drying with minimal energy use. Delivering dishes that are clean, dry, and ready to be put away.

Connect and Control

Designed to work beyond the kitchen, this dishwasher can be controlled through WiFi using the SmartHQ™ app. Start cycles, monitor progress and receive notifications on the go, keeping everything moving quietly in the background.

SPECIFICATIONS

Accessories (included)

Cutlery basket	•	Energy saving delay start option of up to 12 hours	•	Width	597 mm
Capacity and loading		Internal light	•	Wash Program Modifiers	
Accommodates round plates up to (lower basket)	320mm	Keylock	•	Dry +	•
Accommodates round plates up to (top basket)	200mm (with cutlery tray)	Rinse aid indicator light	•	Half load	•
Adjustable height, foldable cupracks	•	Smart appliance	•	Intensive	•
Easy lift adjustable upper basket	•	Time remaining LED display	•	Sanitise	•
Fold down tines	•	Features		Wash modifiers	4
Full width cutlery/utensil tray	•	Aquastop	•	Wash Programs	
Large crockery insert in lower basket	•	Auto Door Open Dry	•	60 min	•
Place settings	15	Fan assisted drying	•	Auto	•
Place settings	15	Flood protection	•	Eco	•
Wine glass supports with stemware grippers	•	Fully independent spray arms	•	Heavy	•
Connected Features		Half load option	•	Light	•
Alerts and notifications	•	Internal tub material	Stainless Steel	Medium	•
Education and onboarding	•	Motor type	BLDC	Rinse	•
Monitoring	•	Three-stage filtration system	•	Wash programs	7
Remote operation	•	Performance		Water connection	
Software updates	•	Noise emissions	42 dBA	Water pressure	30kPa - 1000 kPa
Consumption		Power requirements		Water supply	3/4" BSP (20mm) Connector Water Inlet Hose
Energy rating	4.5 star	Dedicated Circuit (A)	10A	SKU	
Energy usage	206 kWh/year	Supply frequency	50 Hz	84223	
In-use energy carbon emissions estimate	19.6kgCO2e/year	Voltage	220 - 240V		
Water consumption (per wash cycle)	11.1L	Product dimensions			
Water rating	5.5 star (WELS)	Depth	600 mm		
Controls		Height	850 - 895 mm

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
