12kg Series 11 Minimal Washer, ModDose

Series 11 | Minimal

Grey Glass

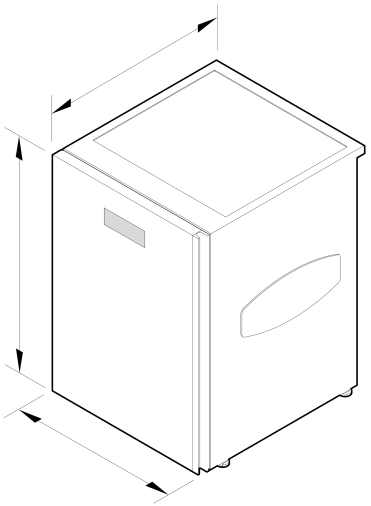

The ultimate Washer, where refined design meets intelligent precision. Adaptive sensing, a streamlined interface, and thoughtful detailing deliver care that's perfectly tailored to every fibre.

- Optimal care for 15 fibre types, including Cashmere and Lyocell
- Full-glass design with vibrant 7" touchscreen for intuitive cycle selection
- Switch in and out specialist detergents with interchangeable ModDose cartridges
- Detect load size, soil level, and colour with multi-sensory intelligence
- Connect SmartHQ™ for notifications, guides and extra functions

DIMENSIONS

Height	850 mm
Width	602 mm
Depth	676 mm

FEATURES & BENEFITS

OPTIMAL CARE FOR LUXURY FIBRES

Fisher & Paykel Series 11 Washers are the pinnacle of fabric care, turning every wash into a celebration of your finest fabrics. From the soft luxury of Cashmere scarves to the breathable comfort of Hemp trousers, or the flowing elegance of a Lyocell dress - each fibre is nurtured with precision, guided by the vivid 7" touchscreen. Intelligent technology accounts for the moisture absorption and fibre construction of each garment, adjusting temperature, speed, drum movement and detergent to deliver a perfectly balanced clean while extending the life of your garments.

ULTIMATE FABRIC CARE SOLUTIONS

Simple yet striking, our Minimal Fabric Care appliances have been distilled into a unified aesthetic. Precision-machined glass, a 7" touchscreen, extruded aluminium handles, and a tonal palette creates a refined look that blends seamlessly into cabinetry. Designed to complement one another in both form and function, our Front Loader Washer, Display-Free Heat Pump Dryer, and Fabric Care Cabinet bring visual harmony to the home, for fabric care that is as beautiful as it is functional.

BESPOKE AUTO DOSE

While Cashmere is similar to Wool, its fine fibres need extra care. Sensitive to high pH detergents, it can lose softness and quality. The intelligent ModDose Dispenser includes six interchangeable cartridges for everyday, specialised, or manual use. Configure each one to be recognised by the machine, which guides the right formula for every fibre and ensures precise Auto Dose for gentle, tailored care.

INTELLIGENT COLOUR SENSING

Protect the vibrancy of Denim, Linen, and Silk with our advanced Colour Sensing. The system quickly distinguishes darks from whites, enabling tailored wash cycles with specific temperature profiles for each fibre. This reduces colour fading and preserves the brightness, depth, and richness of your garments for longer.

TAILORED STAIN CARE

Stains behave differently depending on the fibre they're on — Butter should be washed in a solid state to prevent it from sinking into the pores of the fibre, while Tea, Coffee, and Red Wine cling more strongly to Cotton than Polyester. Our 5 Stain Treatments for 3 fibre types provide pre- or in-wash care tailored to both fibre and stain, lifting marks effectively while protecting the life and quality of your garments.

REFRESH WITH STEAM

Gently relax fibres to reduce wrinkles and odours with Steam Refresh. Perfect for a Hemp shirt or trousers, it smooths creases and restores the fabric's natural shape. With a naturally rigid structure and high lignin content, Hemp fibres resist deep creasing and rebound effectively when steamed, leaving garments smooth, soft, and refreshed — without the need for a full wash.

ENGINEERED FOR LIFE

Performance that stays consistent for decades. Life tested through 6000 continuous cycles, our washing machines are built to deliver stable, consistent care over years of real use. Engineered for lasting performance, they deliver reliable fabric care from the first wash to the 6000th.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
