

# Heat Pump Dryer, 9kg

Series 7 | Heat Pump

White

Heat Pump Dryer, 9kg

- 13 dry cycles, including Wool, Towels and Sports
- A ++ Energy Rating
- Auto-sensing detects moisture levels to prevent under or over drying

## DIMENSIONS

Height	850mm
Width	600mm
Depth	670mm

## FEATURES & BENEFITS

- 13 fabric care cycles**  
Select the right cycle for any fabric type, from the most precious and delicate to those heavier essential items
- Heat pump technology**  
Heat pump technology dries at lower temperatures for gentle fabric care and because moisture is condensed, no venting is required. This is an ideal dryer for laundries where venting is difficult as it can be placed almost anywhere in the home.
- Too Precious To Tumble?**  
The drying rack is designed for items that can't be tumble dried. It fits easily into the dryer and delivers the perfect result for those precious delicates, shoes and toys.
- Sports cycle**  
The low heat Sports cycle is perfect for whatever the game throws at you, and ensures that your gear is ready for the next one.
- Easy-Clean Filter**  
An additional easy-access and easy-clean condenser filter adds an extra level of protection for capturing lint, preventing build up on the dryer's condensing system and helping to maintain a high level of efficiency.
- Designed To Match**  
The Heat Pump Condensing Dryer is designed to match beautifully with any Fisher & Paykel front loader washing machine, creating the perfect pair to deliver complete fabric

care.
