

Series 9 Integrated Dishwasher, Heat Pump

Integrated

Designed for everyday energy efficiency, this Integrated Dishwasher features the latest innovation in Heat Pump Technology to reduce energy use by up to 50%*. On the inside, low energy drying and refined detailing brings exceptional performance and style to your kitchen.

- Heat Pump technology helps reduce energy usage by up to 50%* compared to a standard dishwasher
- Auto Door Open ensures beautifully dry dishes with less energy, Air Curtain channels steam away to protect cabinetry
- Quiet cycle runs at as low as 40 dBA, ideal for open-plan living
- Flexible racking and secure glassware holders adapt to the way you wash, caring for everything from wine glasses to oven trays

DIMENSIONS

Height	820 - 880 mm
Width	597 mm
Depth	560 mm

FEATURES & BENEFITS

LEADING ENERGY EFFICIENCY

Our most efficient dishwasher yet, thanks to innovative Heat Pump technology. With a 50% reduction in energy* compared to a standard dishwasher, this model offers powerful performance and impressive energy efficiency.

HYBRID HEATING TECHNOLOGY

This intelligent Dishwasher uses Heat Pump technology to reduce energy usage* — with 9 specialised cycles from Light to Heavy, plus Glassware. Using a hybrid approach to heat the water allows for optimised energy efficiency without compromising on cleaning performance.

DRY DISHES, LESS ENERGY

For beautifully dry dishes, Auto Door Open releases steam at the end of the cycle, while the Air Curtain directs moisture away to help protect surrounding cabinetry. Compared with traditional cycles that rely on high heat to dry, it provides energy efficient drying with consistently perfect results.

THE CHOICE IS YOURS

Enjoy greater flexibility in how and when you run your dishwasher. Programmed to automatically adjust time, energy and water usage based on your selection, every wash, from a quick 60 min cycle to a Quiet cycle as low as 40 dBA, gives you control over how you clean.

FLEXIBILITY FOR EVERY LOAD

Easily fit plates, bowls, trays, or large pots with pitch-adjustable tines and flexible racking. This versatile design paired with a generous internal capacity gives you the freedom to easily configure each wash to suit the rhythm of your kitchen routine.

SET AND FORGET WITH AUTO

For the perfect clean, the Auto cycle uses intelligent technology to sense how dirty your dishes are and adjusts the wash settings for the best results. Combined with the three-stage filtration system and rinse aid indicator, you can be confident your dishes will come out spotless.

INTEGRATION MEETS INNOVATION

With thoughtful design inside and out, this Dishwasher features internal LED lighting, a floor light to display cycle progress and responsive touch controls — seamlessly integrated with your kitchen cabinetry. For even more control, connect remotely via SmartHQ™ for effortless operation and real-time cycle updates.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
