- Automatic spill detection shuts off elements if pans overflow
- Touch & Slide controls easily control each cook zone

DIMENSIONS

Height	58 mm
Width	600 mm

Depth 530 mm

FEATURES & BENEFITS

Fast Response
Fisher & Paykel electric cooktops feature powerful ribbon elements that heat up quickly and maintain an even temperature. AutoHeat mode boosts power and then automatically adjusts to your chosen setting for faster cooking.

Precise Control
The cooktop touch controls are easy to use, responsive and accurate across a range of cooking temperatures – from a rapid boil to a slow simmer. The timer function can be used as a simple minute minder or to activate any combination of elements.

Easy Cleaning
Fisher & Paykel electric cooktops have a completely flat ceramic glass profile which makes cleaning up a breeze. Cooktop elements automatically shut down when a spill is detected, minimising baked-on grime.

Safety Cut-Off

Spill detection technology built into the control panel keeps your home safe – and prevents ruined meals – by automatically shutting off hot elements when pots or pans overflow onto the controls.

Complementary Design
The electric ceramic series is designed to match the rest of Fisher & Paykel's kitchen appliance family, with a stylish frameless design, sleek ceramic glass surface and intuitive controls.

Sized To Suit
Fisher & Paykel electric cooktops come in a range of sizes to suit every kind of kitchen. Because they're perfectly flat and cool down fast, they can be used as an extension of your preparation surface when they're switched off.

SPECIFICATIONS

Cleaning
Flat easy clean glass surface

Controls
Minute timer
Touch and slide controls

Performance
Dual colour display
Hi-light high speed ribbon elements

Power requirements
Supply voltage 230 - 240 V

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
