## FEATURES & BENEFITS

### 13 fabric care cycles

Select the right cycle for any fabric type, from the most precious and delicate to those heavier essential items

### Heat pump technology

Heat pump technology dries at lower temperatures for gentle fabric care and because moisture is condensed, no venting is required. This is an ideal dryer for laundries where venting is difficult as it can be placed almost anywhere in the home.

### Too precious to tumble?

The drying rack is designed for items that can't be tumble dried. It fits easily into the dryer and delivers the perfect result for those precious delicates, shoes and toys.

### Sports cycle

The low heat Sports cycle is perfect for whatever the game throws at you, and ensures that your gear is ready for the next one.

### Easy-clean filter

An additional easy-access and easy-clean condenser filter adds an extra level of protection for capturing lint, preventing build up on the dryer's condensing system and helping to maintain a high level of efficiency.

### Designed to match

The Heat Pump Condensing Dryer is designed to match beautifully with any Fisher & Paykel front loader washing machine, creating the perfect pair to deliver complete fabric care.

### Wi-Fi enabled

Your dryer is Wi-Fi enabled, giving it the potential to continuously improve and integrate with smart homes in the future.
