

# Induction Hob, 83cm, 4 Zones with Integrated Ventilation

Series 9 | Minimal

Black Glass

A true two-in-one appliance, this hob combines the precision of induction cooking with powerful extraction in one seamless, stylish hob.

- Seamless kitchen integration, without the need for overhead ventilation
- Four cooking zones, including simple pairing of two zones to create a SmartZone
- With nine fan speeds plus boost, select the perfect extraction rate for your cooking
- Minimal style, sleek black glass finish to suit any kitchen design

## DIMENSIONS

Height	218mm
Width	830mm
Depth	515mm

## FEATURES & BENEFITS

### Seamless integration

Offering true design freedom, this hob can be placed anywhere – eliminating the need for bulky overhead ventilation and helping to create a seamless flow between kitchen and living spaces. Installed raised or flush, it's perfect for islands, or homes with high ceilings.

### Elegant design

The subtle black glass and durable matte black detailing blend elegance with durability. With premium styling, these hobs seamlessly blend with other appliances for a cohesive, considered kitchen design.

### Precise Control

Fisher & Paykel induction hobs offer extremely accurate temperature control from very high to very low heats, so you can sear, sauté and temper like a pro. Touch&Slide controls react immediately when you adjust the temperature, so you can go from a boil to a simmer in seconds.

### Effective extraction

Designed for busy homes, the integrated ventilation works effectively and unobtrusively in the background. Featuring nine fan speeds, plus a boost function, for quickly removing odours and steam.

### Safety of induction

Induction hobs only start heating your pot or pan once you've placed it on the surface and stop as soon as you remove it – so

they are safer for everyone.

### Ease of use

Designed for simple removal, the grease filter tray effectively captures spills, while the single glass cooking surface can be easily wiped clean. A flush ventilation grille allows pots to effortlessly slide across the hob surface.

### Superior Efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the hob surface. This makes induction cooking more energy-efficient than electric or gas hobs.

## SPECIFICATIONS

### Accessories (sold separately)

Square grille & butterfly valve	82393 DO-G-SS (optional)
---------------------------------	--------------------------

### Cleaning

- Dishwasher safe grease filter
- Flat easy clean glass surface
- Flush grille

### Consumption

Energy rating	A+
---------------	----

### Controls

- Auto cut-off timer for each
- Minute timer
- Soft-touch electronic controls
- Touch and slide controls
