

# 24" Series 7 Pyramid Chimney Wall Range Hood

Contemporary

This wall chimney range hood has contemporary styling, extracting steam, grease and cooking odors quietly and efficiently.

- With three fan speeds, select the perfect extraction rate for your cooking
- Energy-efficient LED lighting to illuminate your cooking surface
- Powerful 600CFM maximum airflow blower
- Compliant with Title 24 regulations

## DIMENSIONS

Height38 3/8 - 21 1/16 "

Width23 9/16 "  
Depth19 11/16 "

## FEATURES & BENEFITS

- Easy Installation**  
This wall chimney vent hood is the perfect partner to your Fisher & Paykel cooktop. It can be either externally ducted or internally recirculated, making it perfect for apartments.
- Simple To Clean**  
Two filters effectively trap grease particles during extraction. They are easy to remove and dishwasher safe, or can be cleaned by hand in hot soapy water.
- Complementary Design**  
This wall chimney ventilation hood's stainless steel finish will complement any contemporary kitchen and is designed to match the rest of Fisher & Paykel's kitchen appliance family.
- Design Quality**

Made from quality stainless steel with an excellent finish and robust product design, this range hood is both visually appealing and durable.

**Considered Efficiency**  
The extraction rate ensures interior air is not excessively removed to the outside, while LED lighting on the range hood has been chosen for energy efficiency.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
