90cm Series 7 Integrated Insert Wall Rangehood

Series 7 | Integrated

Stainless Steel and Glass

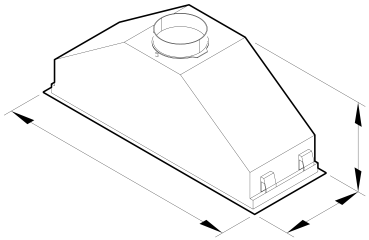

With edge-to-edge extraction, this rangehood is perfectly hidden away in your cabinetry.

- With three fan speeds plus a boost function, select the perfect extraction rate for your cooking
- Powerful maximum air movement of 780m³/hr
- Energy-efficient LED lighting to illuminate your cooking surface
- Pair with a compatible cooktop and the extraction rate will automatically adjust to suit your cooking
- Wi-Fi enabled for notifications through the SmartHQ™ app

DIMENSIONS

Height	316 mm
Width	830 mm
Depth	280 mm

FEATURES & BENEFITS

Achieve The Invisible

This stylish rangehood fits seamlessly into your kitchen cabinetry, providing ventilation that is as discreet as it is powerful.

Effective Extraction

Featuring three fan speeds, plus a boost function, this rangehood provides powerful extraction to quickly remove odours and steam. Odours can linger in the kitchen well after cooking is finished so the timer keeps the hood working for up to 15 minutes before automatically turning off.

The Perfect Pair

Achieve kitchen perfection by pairing this rangehood with a compatible cooktop. The fan speed will automatically adjust to suit the cooktop power levels, eliminating the need for manual adjustments.

Easy Cleaning

Designed for simple removal, the filters are easy to clean and dishwasher safe, while the glass and stainless steel finish is easily wiped clean. The SmartHQ™ app will notify you when to clean the filter to ensure you get the best performance out of your rangehood.

Quality Materials

This rangehood comes in a sleek black glass finish with a real stainless steel frame.

Full Surface Lighting

Low energy, dimmable LED lights provide superb illumination of the entire cooking surface.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
