12kg Series 9 Minimal Washer, FlexiDose

Series 9 | Minimal

Grey Glass

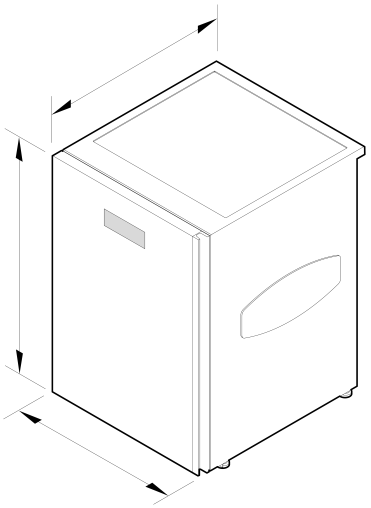

A modern Washer with a sleek, full-glass design. With intelligent sensing and delicate care, the vibrant 7" touchscreen controls and flexible convenience ensure every cycle is effective, gentle and reliable.

- Advanced care for 7 fibre types, including ultra-delicate Silk and Down
- Full-glass design with vibrant 7" touchscreen for intuitive cycle selection
- Flexi Dose for customised Auto Dose of up to 21 washes without refilling
- Tumbling post-wash prevents creases, and after unloading, air dries the drum with the door closed
- Connect SmartHQ™ for notifications, guides and extra functions

DIMENSIONS

Height	850 mm
Width	602 mm
Depth	676 mm

FEATURES & BENEFITS

ADVANCED CARE FOR DELICATES

Fisher & Paykel Series 7 Washers make caring for your delicate garments effortless with a full-colour 7" touchscreen guiding every wash. From soft Silk and delicate Down to Woolmark Black certified Wool cycles, intelligent technology automatically adjusts the wash for each fibre type, delivering the perfect clean while protecting fabrics. With ActiveIntelligenceTM load and soil level sensing, plus options for item type and colour, you can further customise each cycle — extending the life of garments by keeping them looking and feeling their best.

REFRESH WITH STEAM

Gently relax fibres to reduce wrinkles and odours with Steam Refresh. Perfect for a down jacket or duvet, Steam restores shape, softness and freshness in minutes without a full wash. By adding just the right amount of moisture and movement, Steam helps revive compressed down fibres, restoring softness, shape, and improving fluffiness so your garments look and feel their best.

CUSTOMISED AUTO DOSE, IDEAL FOR SILK

Everyday routines are simpler when the details are taken care of for you with Auto Dose. ActiveIntelligence™ senses load size and soil level, Auto Dose delivers the right amount of detergent, and Active Mix blends it with water for a gentle, effective wash. Two FlexiDose reservoirs let you use detergent and softener, storing enough for up to 21 washes when both are used for detergent, or specialised formulas — ideal for Silk, with it's delicate protein fibres that weaken when wet and need extra care to maintain softness and sheen.

GENTLE AND HYGIENIC

Keep garments hygienic with two sanitising options, both proven to eliminate 99.9% of bacteria*. UV Sanitise works at low temperatures, ideal for heat-sensitive fibres like Elastane that can degrade under high heat. For more durable fabrics, hot water Sanitise delivers a traditional-high temperature clean. *UV Sanitise independently certified to eliminate 99.9% of Staphylococcus aureus and Escherichia coli using the Cotton Fibre Type, Durable Item Type, Sanitise Treatment, Dark Colour, Moderate Soil Level and Manual Auto Dose settings. Sanitise independently certified to eliminate 99.9% of Staphylococcus aureus and Escherichia coli using the Mixed Fibre Type, Moderate Item Type, Sanitise Treatment, Mixed Colour, Moderate Soil Level and Manual Auto Dose settings.

FABRIC CARE ON YOUR TERMS

Crease Free gives you flexibility to unload laundry when it suits you. Ideal for Down, which can clump and compress when wet, Crease Free gently tumbles the load while damp to separate and loosen fibres, preserving the natural loft and softness of garments and bedding. Drum Dry completes the care cycle by quietly circulating air to fully dry the drum. Simply close the door and the machine will be dry and ready for the next load when you are.

ENGINEERED FOR LIFE

Performance that stays consistent for decades. Life tested through 6000 continuous cycles, our washing machines are built to deliver stable, consistent care over years of real use. Engineered for lasting performance, they deliver reliable fabric care from the first wash to the 6000th.

PRECISION IN EVERY DETAIL

Simple yet striking, our Minimal Fabric Care appliances have been distilled into a unified aesthetic. Precision-machined glass, a 7" touchscreen, extruded aluminium handles, and a tonal palette create a refined look that blends seamlessly into cabinetry. Designed to complement in both form and function, our glass Front Loader Washers and Heat Pump Dryers bring harmony and light to the modern home.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
