30" Series 9 Contemporary Vacuum Drawer

Series 9 | Contemporary

Brushed Silver Glass

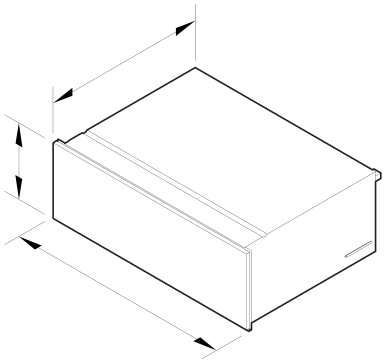

This timeless and expressive Vacuum Drawer can be used to prepare food for sous vide cooking, marinating and storage.

- Three levels of vacuum and heat sealing for food storage, marinating or portioning
- Effortless preparation for sous vide cooking
- Push-to-open drawer and intuitive touch controls for effortless operation
- Designed to match our Contemporary style appliances, for the ultimate kitchen solution

DIMENSIONS

Height	10 11/16 "
Width	29 7/8 "
Depth	22 1/2 "

FEATURES & BENEFITS

PRESERVE FRESHNESS

Vacuum sealing removes excess air to create the ideal environment for longer-lasting freshness. By reducing air exposure, it helps prevent bacteria growth and freezer burn, keeping flavours and textures intact. Food-grade, BPA-free bags offer a safe and reusable storage solution.

EFFORTLESS SOUS VIDE PREPARATION

Enhance flavor and texture with vacuum sealing that locks in marinades, natural juices, and nutrients. Create perfectly sealed portions ready for precise sous vide cooking, ensuring consistently tender and flavorful results.

THREE LEVELS OF SEALING

Choose from three levels of vacuum sealing to suit a variety of foods, from delicate items such as soft fruits and herbs to hearty cuts of meat.

PERFECT WINE PRESERVATION

Keep your wine tasting at its best with a simple vacuum seal. Using the included tube, adapters and stopper, air is gently removed to preserve flavor and aroma, so every pour stays fresh and perfectly balanced.

EASY TO CLEAN

The stainless steel interior is designed for simple maintenance and can be easily wiped clean with a damp cloth.

DESIGNED TO MATCH

Designed to complement our Contemporary style family of appliances, this Vacuum Drawer features a brushed silver finish with refined detailing. Able to be seamlessly built in almost anywhere, our companion products are crafted to align beautifully and install at the height that best suits your kitchen and lifestyle.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
