- With soft-close drawers, and knock to pause convenience

- Wi-Fi capability and a SmartHQ™ app for remote control and notifications

DIMENSIONS

Height	34 - 36 3/8 "
Width	23 9/16 "
Depth	22 1/2 "

FEATURES & BENEFITS

Seamless Integration

Install your DishDrawer™ Dishwasher into an existing kitchen space or integrate into kitchen cabinetry. The touch-sensitive control panel is located inside this Integrated model, leaving an uninterrupted exterior that blends seamlessly with surrounding cabinetry.

Ease Of Use

DishDrawer™ Dishwashers are beautiful to use with soft-close drawers. The tall top drawer fits your larger plates and dishes up to 12 1/4 inches, while the bottom drawer is ideal for small washes. Flexible racking includes height-adjustable cup racks and wine glass supports.

True Half Load

Both drawers fit a true half load. Each drawer operates independently, so you can wash one load while stacking the other drawer, or wash simultaneously on separate cycles.

Flexible Wash Options

Eight wash programs including Auto, 60min and Glassware, while modifiers such as Sanitize, Dry+ and Quiet provide added wash flexibility. The Quiet wash modifier reduces the noise on some cycles while maintaining performance – perfect for late night washing.

Design Quality

Every detail has been carefully crafted using quality materials, from the easy-to-clean stainless steel interior to the spray arm sensor that detects jams for increased wash confidence.

Knock To Pause

For ease-of-use, these DishDrawer™ Dishwashers have a knock to pause function. A knock on the front panel will pause the dishwasher, which can be restarted by using the start button.

Efficient performance

With a Energy Star Most Efficient rating, this DishDrawer™ Dishwasher is recognised amongst the most energy efficient models on the market.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
