

Series 9 Integrated Double DishDrawer Dishwasher

Integrated

Introducing the next evolution of DishDrawer™ design. The Integrated Double DishDrawer™ Dishwasher delivers advanced performance, quiet efficiency and seamless integration within kitchen cabinetry. New wash technology offers a step up in energy and water efficiency, engineered for real life and shaped by decades of DishDrawer™ innovation.

- Wash one, stack another. Independent drawers run separately or together, fitting plates up to 280mm in diameter
- Capacitive touch controls, refined styling and SmartHQ™ connectivity bring intuitive convenience to everyday dish care
- Adaptable racking fits everything from glassware to cookware, offering flexibility for every occasion
- Versatile wash cycles and modifiers ensure clean results, while fan-assisted drying helps leave dishes ready to use

Restriction of the Use of Hazardous Substances (Chinese)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
