- Pyrolytic self-cleaning function breaks down food residue for an easy clean

DIMENSIONS

Height	23 9/16 "
Width	23 7/16 "
Depth	22 1/4 "

FEATURES & BENEFITS

Handleless Design
Effortlessly open and close your oven with a gentle press of a button, ensuring convenience and smooth operation in the kitchen. Moving away from traditional oven doors, this model is an ideal match for kitchens with a continuous, handle-free design, ensuring a seamless flow across the cabinetry.

Hands-Free Control
Experience the ultimate kitchen convenience with the SmartHQ™ app's voice-activated oven door. Connect your SmartHQ™ account with Google's voice assistant for hands-free control—simply speak to a compatible device* to open your oven door. Multitasking in the kitchen has never been so effortless.
*Device must be compatible with the Google Home app.

Cook With Confidence
Using the large 5" touchscreen interface, you can cook with a favorite method, hero ingredient, cooking function, or recipe. Your oven will guide you through the steps, or change the temperature and heat type automatically, depending on your selection.

Generous Capacity
With a generous 3 cu ft total capacity, you can create several perfectly cooked dishes at once using multiple shelves. Non-tip, full-extension shelves help to ensure safe removal of hot dishes.

Exceptional Performance
Our unique cooking technologies were developed to help deliver perfect results. ActiveVent ensures optimized moisture levels, while AeroTech™ circulates heat evenly for a consistent temperature.

Self-Cleaning
Pyrolytic self-clean breaks down food residue at a very high temperature, leaving a light ash that’s easily removed with a damp cloth. The enamel-coated side racks don't need to be removed when using this function.

Design Freedom
Crafted with premium materials and detailing, this oven supports a cohesive and considered kitchen design. Complement it with our Minimal style Warming Drawer to achieve the ultimate kitchen solution.

SPECIFICATIONS

Accessories (included)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
