8.5kg Series 5 Front Load Washer, Steam Care

Designed for everyday laundry, this 8.5kg front load washer combines practical capacity with time-saving features for fabric care you can rely on. Steam Refresh freshens lightly worn garments without a full wash, while the Allergy Care cycle supports hygienic washing. Quick Wash options add flexibility when time is limited.

- 8.5kg capacity suited to everyday household laundry loads
- Steam Refresh freshens lightly worn clothes without needing a full wash
- Allergy Care cycle helps reduce common allergens for more hygienic washing
- Quick Wash cycles save time with 15 and 30 minute options

DIMENSIONS

Height	850 mm
Width	595 mm
Depth	566 mm

FEATURES & BENEFITS

Sized for everyday loads

With an 8.5kg capacity, this front load washer is ideal for everyday household laundry. It offers flexibility for daily routines, from smaller washes to larger loads.

Quick Steam Refresh

Steam Refresh is ideal for lightly worn clothes that need freshening. The 20 minute cycle helps reduce odours and wrinkles, so garments are ready to wear again without a full wash.

Allergy care

The Allergy Care function is designed to support hygienic washing by reducing common allergens from fabrics.

Quick wash cycles

Save time with Quick Wash options of 15 and 30 minutes, ideal for lightly soiled laundry or when time is limited.

Eco options

Eco Options let you adjust wash settings to help manage energy and water use during everyday washes.

Add a garment

Missed an item from your wash? The Add a Garment function allows you to pause your wash cycle, open the door and add or remove items, then carry on washing.

ATB Gasket

The ATB gasket helps maintain a reliable seal and supports long-term performance during regular use.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
