

30" Series 9 Professional 4 Burner Dual Fuel Self-Cleaning Range, LPG

Professional

- Get the best of gas and convection technology in this striking range with intuitive touchscreen and specialized cooking functions.
- Guided cooking using your touchscreen makes it simple to cook by food, function or recipe.
 - Top burner heat of 19,000 BTU, for seriously fast boiling
 - 4 cu ft total oven capacity
 - Beautiful LED halo-illuminated dials provide information at a glance

DIMENSIONS

Height	35 3/4 - 36 3/4 "
Width	29 7/8 "
Depth	29 1/8 "

FEATURES & BENEFITS

- Cook With Confidence**
Our touchscreen interface provides an intuitive guided cooking experience that helps deliver perfect results, whether you've been cooking all your life or just starting out. Cook with a favorite method, a hero ingredient, or a go-to cooking function or recipe. The screen tilts for improved ergonomics and optimal visibility while cooking.
- Generous Capacity**
Featuring a generous total capacity of 4 cu ft, with enough room to fit a 26 lb turkey, or to cook several dishes at once.
- Cooking Flexibility**

No matter what you're cooking, you've got the right heat to get perfect results. Each of the 15 oven functions have been extensively researched and carefully designed to cater to a broad range of dishes and cooking styles. The handy food probe helps you monitor your progress.

Cooktop Power
Sealed dual flow burners deliver cooktop power up to 19,000 BTU for seriously fast boiling, and precise 140°F full surface, low temperature cooking with the gentlest of flames.

Design Quality
This range has craftsmanship in every detail, with real stainless steel, cast-iron grates, and beautifully weighted, halo illuminated dials. Each cavity features incandescent lights and full extension telescopic racks. From the robust legs to the powerful cooktop, this Range is built to last.

Easy To Clean
The oven features a self-cleaning function and self-clean proof side racks, which don't need to be removed when using this function.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
