FEATURES & BENEFITS

- The Pinnacle Of Fabric Care**
Intuitive controls with clever drying hints help you get the best results. The LCD display provides a simple interface to select from 23 dry cycles; including Steam Freshen, Hygiene, Activewear, Wool, Silk and Denim.
- Dewrinkle, Deodorise, Detangle**
The steam cycle is perfect for occasions where clothes have been worn once and need freshening. An alternative to full-cycle washes, it removes odours without using detergent and gently eases the creases out of clothes to save precious time spent ironing.
- Customise Your Drying With Optimise Dry**
For a focus on energy efficiency, dry with the default Optimise Dry Eco option. Choose Speed to shorten cycle times, while Quiet mode reduces cycle noise - perfect for late night laundry. Available on Everyday, Cottons, Towels and Heavy cycles.

- Tangleprotect Technology**
TangleProtect technology pairs an advanced air circulation system with true reverse tumbling to reduce tangling and balling during the dry cycle – ensuring your clothes and sheets are dried consistently and evenly.
- Faster Dry Times**
Speed mode utilises a variable speed compressor to deliver a faster drying time, closer to timings experienced with vented dryers.
- A Perfect 10**
This dryer uses heat pump technology to gently and effectively dry clothes at low temperatures. With an outstanding 10-star energy rating, you can dry with confidence.

Health And Hygiene

The Hygiene cycle provides extra protection for your clothes. The extra high dry temperature is designed to kill more than 99.9% of bacteria and reduce allergens, perfect for durables such as sheets and towels.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
