 - Wi-Fi enabled and works with the SmarHq™ app for remote control and notifications

DIMENSIONS

Height	820 - 880 mm
Width	597 mm
Depth	574 mm

FEATURES & BENEFITS

- Seamless Design**
Install this dishwasher flush under your benchtop with minimal gaps. Designed to match our Contemporary family of appliances with a recessed handle for a seamless finish in your kitchen.
- Effortless Drying**
For beautifully dry dishes every time, this dishwasher features the Auto Door Open Dry function. This function automatically releases excess steam at the end of the cycle, ensuring dishes are immediately ready for use or storage. An innovative air curtain channels the steam away from the adjacent benchtop, protecting your cabinetry.
- A Reliable Clean**

This dishwasher offers seven wash programs including Auto, which automatically senses the optimal wash settings for your dishes. The three-stage filtration system delivers a superior clean, while the rinse aid indicator reminds you to top up for beautifully clean dishes.

Customise Your Wash
The Half Load modifier is perfect for washing a partial load, for faster turnaround of dishes. Sanitise provides extra protection, killing 99.9% of bacteria* in the final rinse, while the Dry+ modifier is great for plastic dishes.
*Certified to NSF/ANSI Standard 184

Efficient Performance
With a 4 star energy rating and 5 star water rating, this dishwasher delivers a powerful wash. Use the Eco wash program for optimal water and energy consumption, or choose when the cycle begins with Delay Start.

Flexible Loading
Designed to fit 15 place settings with ease, adjustable racks help you to load and care for various items – including a height-adjustable upper basket, and foldable cup holders and tines.

Wash Program Data (English)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
