

10kg Series 11 Contemporary Display-free Heat Pump Dryer, Woolmark Blue

A premium Heat Pump Dryer designed to adapt to every fabric and load. Controlled via a compatible Front Load Washer, exceptional convenience delivers gentle, thorough, and reliable care for a wide range of fabrics.

- Optimal care for 15 fibre types, including Ramie and Hemp
- 3D Active Sense detects moisture deep into the load, even in bulky items or large loads
- Intelligent Temperature System maintains controlled, low temperatures for perfectly precise drying
- Woolmark Blue certified for hand-wash only woollens
- Connect SmarthQ™ for notifications, guides and extra functions

DIMENSIONS

Height	850 mm
Width	602 mm
Depth	682 mm

FEATURES & BENEFITS

OPTIMAL CARE FOR LUXURY FIBRES

Fisher & Paykel Series 11 Dryers are the pinnacle of Fabric Care, with intelligent drying that responds to the unique needs of every fibre. Finely tuned cycles care for synthetic fabrics like Nylon and Elastane plus natural fibres like Linen and Hemp, each dried at the temperature and rhythm best suited to their molecular structure and properties. Controlled via a compatible Front Loader Washer, advanced sensors and Heat Pump technology work in harmony to preserve softness, shape and quality with precision.

ULTIMATE FABRIC CARE SOLUTIONS

Our most perfect pair yet, reimagined for modern living. A concealed handle, large glass door, machined control panel, and refined materials create a purity of form that balances luxury with lasting quality. A glass fascia and push-to-open dispenser offer seamless integration with cabinetry, whether stacked or side by side. Designed to complement in both form and function, our Front Loader Washer, Display-Free Heat Pump Dryer, and Fabric Care Cabinet bring visual harmony to the home, with the Dryer seamlessly controlled via the Washer's touchscreen.

INTELLIGENT HEAT PUMP TECHNOLOGY

Our Intelligent Temperature System with Heat Pump Technology provides gentle care for natural fibres like Hemp. While naturally strong, Hemp requires special care to protect it from going brittle. Our variable speed compressor and Ultra Delicate Item Type reduces strain, using multi-directional drum movements and low-temperature drying at precisely 50°C to dry perfectly while preserving Hemp's natural texture, colour and long-lasting strength.

ADVANCED MOISTURE SENSING

Retain the softness, loft, and warmth of Down jackets with 3D Active Sense. By sensing moisture both on the surface and inside the load, the cycle is adjusted for gentle, even drying. Jackets dry with up to 17% more volume than air drying, protecting fine protein fibres from heat and friction while preserving structure and lasting warmth.

GENTLE CARE FOR THE FINEST WOOL

Even the most delicate, hand-wash only woollens are safely dried with Woolmark Blue certified cycles. Wool fibres are fragile when wet, and heat can quickly alter their structure. Precisely controlled temperature and airflow gently care for each fibre, preserving softness, shape, and fit so garments emerge beautifully maintained and ready to wear.

STEAM REFRESH

Gently refresh Hemp garments with Steam Refresh. Fully saturated Hemp fibres can swell and form creases in the fabric as it dries, but Steam Refresh temporarily relaxes the fibres, breaking hydrogen bonds and allowing the fabric to smooth out. By adding just the right amount of moisture, it helps reduce wrinkles and restore Hemp's natural drape, softness and fresh appearance.

PROTECT LINEN FROM TANGLING

TangleProtect keeps Linen garments moving freely by alternating drum direction, preventing twisting or clumping that can cause uneven drying. Linen fibres absorb water easily, causing them to swell and collapse, which leads to creasing. The Linen cycle and full-reversing drum gently tumbles garments, reducing strain, reducing wrinkles, and preserving Linen's natural softness, texture and drape.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
