

# Gas Rangetop, 30", LPG

Series 9 | Professional

Stainless Steel | LPG

A powerful high-heat four burner with precision control and performance. Pair with any other appliance in our Professional range.

- Your burners can deliver anything from a high 19,000 BTU heat per burner for fast boiling, to a gentle flame for simmering
- Continuous surface grates designed for pots and pans to move safely across the cooktop

## DIMENSIONS

Height	8 5/16"
Width	29 7/8"
Depth	28"

## FEATURES & BENEFITS

### Perfect heat

Sealed Dual Flow Burners™ deliver rangetop power up to 22,500 BTU (NG models) for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.

### Precise Control

From the highest to the lowest temperatures you get total control with halo-illuminated rangetop dials. A precise full surface simmer is delivered across all burners.

## Cooking Flexibility

The continuous surface grates are designed for pots and pans to move safely across the rangetop. Full coverage, deep-platform style grates are designed so heat goes directly onto the pot rather than the grates themselves, for a faster boil and energy efficiency.

## INFORMATION AT A GLANCE

LED halo control dials provide information at a glance and assist in alerting you if any burners are accidentally left on.

## Easy cleaning

These rangetops have sealed burners and a single sheet cooking surface which, combined with a commercial-style stainless steel finish and dishwasher-safe grates, allow easy cleaning.

## Complementary design

Built to last with distinctive, bold styling, this rangetop is designed to match the Fisher & Paykel Professional style family of appliances.

## SPECIFICATIONS

### Burner ratings

Max burner power	Yes
Power back left	18500BTU
Power back right	18500BTU
Power front left	22500BTU
Power front right	18500BTU

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.
