

# 60cm Series 5 Integrated Refrigerator Freezer

Integrated

Perfect for smaller kitchens or multi-residential spaces, this compact refrigerator integrates seamlessly behind your cabinetry. It offers generous storage, a Variable Temperature Zone for precise food care, and Wi-Fi connectivity for helpful alerts.

- Seamlessly integrates into kitchen cabinetry with a flush, panel-ready finish
- Designed to optimise energy performance and efficiency
- Variable Temperature Zone drawer creates the ideal environment for different food types
- Active air purification system helps reduce airborne bacteria to support a fresh internal environment

## DIMENSIONS

Height	1772 mm
Width	550 mm
Depth	550 mm

## FEATURES & BENEFITS

### Seamless integration

This compact refrigerator is designed to sit flush within standard joinery, with a panel-ready front for a cohesive kitchen finish. Sized to suit a 60cm cavity, it's an ideal choice for multi-residential developments or any space where seamless integration matters.

### Clever energy

With highly efficient vacuum insulation reducing heat transfer, this fridge uses only the energy it needs while keeping your food fresher for longer.

### Simple, universal fit

Installation is fast and flexible, with a reversible hinge and a design that suits common cabinetry systems, including European modular kitchens.

### Variable Temperature Drawer

The Variable Temperature Zone drawer lets you adjust settings to suit different food types. Choose from Fruit & Veg, Beverage, or Meat & Seafood modes to help keep food fresher for longer.

### ActiveSmart™ Foodcare

ActiveSmart™ Foodcare learns how you live and adjusts airflow, temperature and humidity inside the refrigerator to create a stable environment that helps keep food fresher for longer.

### Fast freezing

Fast Freeze rapidly drops the freezer temperature to  $-24^{\circ}\text{C}$  for up to 12 hours to help lock in the texture, taste, and nutrients of fresh food. The frost-free design also means you'll never need to manually defrost the freezer compartment.

### Active air purification

An internal air purification system helps reduce airborne bacteria to support a fresh refrigerator environment.

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
