

# Gas on Glass Hob, 90cm, LPG

Series 9 | Minimal

Black Glass | LPG

A powerful five burner with precision control and performance. Pair with any other appliance in our Minimal range.

- Large cooking area with five burners, including a wok burner and two semi rapid burners
- A timeless, minimal look to fit any kitchen style, with black ceramic glass cooking zones and a black trim
- A flame-failure safety device; if the flame goes out, the gas turns off
- Removable cast iron trivets and ceramic glass that can be wiped down for easy cleaning

## DIMENSIONS

Height	58mm
Width	900mm
Depth	530mm

## FEATURES & BENEFITS

### Complementary Design

The subtle black glass, anodised trim, and black dials blend elegance with durability and are designed to match the Minimal style Series 9 ovens. With premium styling and detailing, these hobs seamlessly blend with other appliances for a cohesive, considered kitchen design.

### Precise control

The consistent flame and heat distribution of the dual flame wok burner combined with the highly responsive dials offer precise heat adjustment that can perfect a slow simmer for sauces or an intense heat for searing steaks.

### Easy Cleaning

Cleaning and care of these hobs is easy with sealed burners and a single sheet cooking surface. After each use, simply remove the trivets and wipe down the glass.

### Safe & Sound

The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

### Quality Materials

Our hobs are built from recyclable, eco-friendly ceramic glass – without using arsenic or heavy metals in the manufacturing process. The glass edges are chip-tested for resistance to damage from pots and pans, ensuring lasting quality.

## SPECIFICATIONS

### Accessories

- High power wok cooking
- Small pan support
- Wok stand

### Accessories (sold separately)

Joiner kit	Part 534731 (required to join
Stainless steel dial kit	82221

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
