

Series 5 Contemporary Dishwasher

Contemporary

Designed to adapt to every load, this dishwasher combines Auto Cycle sensing, ThermoDry technology and flexible loading features to deliver consistent cleaning and drying performance. An adjustable-height rack, foldable tines, Half Load and Dry+ modifiers help optimise care across everything from delicate glassware to heavy cookware.

- Seven wash programs including 60 min and Eco, plus modifiers like Dry+, Sanitise and Half Load
- Auto Cycle senses how dirty the dishes are and adjusts the wash accordingly

- ThermoDry channels moisture away from dishes at the end of a cycle for efficient drying
- For added peace of mind, Aqua Stop automatically shuts off the water if a leak is detected

DIMENSIONS

Height	850 - 895 mm
Width	597 mm
Depth	600 mm

SPECIFICATIONS

Capacity and loading

Accommodates round plates up to (lower basket)	320mm
--	-------

Accommodates round plates up to (top basket)	250mm
Adjustable height, foldable cupracks	•
Fold down tines	•
Height adjustable top basket	•
Place settings	15
Place settings	15

Consumption

Energy rating	3.5 star
Energy usage	295kWh/year
In-use energy carbon emissions estimate	28.0kgCO2e/year
Water consumption (per wash cycle)	12.2L
Water rating	5 star (WELS)

Controls

- Energy saving delay start option of up to 12 hours
- Keylock
- Rinse aid indicator light
- Time remaining LED display

Features

Flood protection	•
Half load option	•

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
