

# 90cm Series 5 5 Zone Induction Hob

Contemporary

This 90cm induction hob provides five versatile zones and Link Mode to connect compatible cooker hood, making it perfect for larger meals and entertaining.

- Five versatile cooking zones let you prepare multiple dishes at once for greater flexibility
- Use Link Mode to automatically activate your compatible cooker hood as you cook
- Easily get started with guided setup and tips in the SmarthQ™ app
- Elevated design offers a sleek, modern look that enhances your kitchen's aesthetic

## DIMENSIONS

Height	61 mm
Width	900 mm
Depth	530 mm

## FEATURES & BENEFITS

### Link Mode compatibility

Use Link Mode to automatically activate your compatible cooker hood as you cook, creating an intuitive, hands-free experience in the kitchen.

### Guided setup with SmarthQ™

SmarthQ™ provides step-by-step onboarding, helpful tips and setup guidance — right from your phone. Designed to support you beyond installation, the app helps you get familiar with your hob and explore its features at your own pace.

### Enhanced features

PowerBoost and GentleHeat deliver precise temperature control — from intense heat for searing meat to low, steady warmth for melting chocolate. An integrated timer helps you stay on track.

### Five zones for flexible cooking

With five cooking zones, including a central zone for larger cookware, this hob offers generous space and flexibility — ideal for preparing multiple dishes at once.

### Elevated design

A sleek black glass surface, refined detailing, and an updated user interface combine to deliver a hob that looks as good as it performs. Designed for seamless integration, it brings a modern, intuitive touch to everyday cooking.

### Easy cleaning

Induction heats the cookware, not the surrounding surface, so spills are less likely to bake on. The durable ceramic glass cleans easily with a simple wipe after cooking.

### Safer choice

Induction hobs heat only when cookware is detected on the ceramic surface. Features like keylock, safety timeout, hot surface indicators, and auto switch-off in case of spills help ensure a safer cooking environment for everyone.

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
