

90cm Series 5 Classic 4 Zone Induction Cooker

Classic

- Heritage styling paired with contemporary performance, in a freestanding cooker with large convection oven and induction cooktop.
- Large induction cooktop with four cooking zones
 - Convection oven with 140L total capacity and seven oven functions including Fan Bake
 - Optional non-tip full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height 898 - 946 mm

Width 897 mm
Depth 600 mm

FEATURES & BENEFITS

- Quality And Durability**
This freestanding cooker has been carefully crafted in every detail from performance to durability, using quality materials including the balanced door and finely tuned dials.
- Impressive Capacity**
With an extra large 140L capacity, this freestanding cooker has plenty of space for cooking multiple dishes at the same time.
- Power & Control**
Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear and stir fry over powerful heat, or simmer a delicate sauce to perfection.
- Even Heat**

Dishes on the top shelf turn out as perfectly as the ones on the bottom, due to our AeroTech™ convection system that circulates air evenly throughout the entire oven.

Easy To Clean
Cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new for years to come.

Safe And Sound
The door and cavity cooling system keeps the heat on the inside, protecting your hands and surrounding cabinetry.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
