 - Multi-Functional Air Fry Tray for Air Frying, Baking, or Grilling, with a perforated design for even airflow

DIMENSIONS

Height 598 mm

Width 596 mm
Depth 565 mm

FEATURES & BENEFITS

- Flexible Cooking Functions**
Each function has been perfected to deliver the optimal heat for a wide range of dishes, with 9 functions including Air Fry, Fan Forced, and Pizza Bake.
- Considered Controls**
Simple and intuitive control makes cooking easy, with a responsive dial and clear illuminated icons that enable straightforward function selection.
- Multi-functional Accessories**
Thoughtfully designed accessories expand your cooking possibilities. Designed to fit seamlessly into the side ladders, each accessory sits securely in place for confident cooking. The Multi-Functional Air Fry Tray promotes even airflow for crisp, golden results, while the Roasting Dish is ideal for braising or slow cooking.

- Cook With Consistency**
For consistent results throughout the oven, AeroTech™ technology circulates heat evenly throughout the cavity.
- Generous Capacity**
More room means greater flexibility when cooking. With an 85L total capacity, this oven provides ample space for multiple dishes, larger meals, and everyday cooking.
- Engineered for Life**
Built for enduring performance, our Ovens undergo intensive testing equivalent to 7,300 hours or 20 years of real-world use, delivering durability you can rely on.

Rated power	2800-3300 W		

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
