

90cm Series 7 Classic 5 Burner Dual Fuel Cooker

Classic

- Get the best of both worlds with dual fuel. A gas cooktop with wok burner is paired with a nine-function convection oven.
- Five burner gas cooktop, with precise heat control
 - Convection oven with 140L total capacity and nine oven functions including Pastry Bake with pizza mode and rapid proof for making bread
 - Non-tip full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height	898 - 946 mm
Width	897 mm

Depth

600 mm

FEATURES & BENEFITS

- Multi-Shelf Cooking**
Our AeroTech™ system circulates air evenly throughout the entire oven so dishes on the top shelf turn out just as perfectly as food cooking on the bottom shelf.
- Quality And Durability**
Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable cooktop trivets and glowing halo dials all add up to an exceptional, premium range.

Burner Power & Control
Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear, stir fry or simmer a delicate sauce to perfection.

Large Capacity Oven
The generous 140L total capacity oven gives you plenty of space to cook multiple dishes at once.

- Easy To Clean**
Your cooktop simply needs a quick wipe to keep it looking good as new for years to come, as the gas cooktop is made from a single piece of stainless steel that contains spills. The oven door, its inner pane of glass and runners can also be removed for easy cleaning.
- Even Heat**
Accurate, electronically-controlled oven heat ensures a great result every time.

SPECIFICATIONS

Accessories (included)	
Chromed shelf runners	1 set
Flat wire shelf	1
Full extension sliding shelves	1 set (part 578744)
Full extension telescopic shelves	1 set (part 578744)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
