

# 90cm Series 7 5 Zone Induction Cooktop, SmartZone

Minimal

Featuring powerful induction technology and a flexible SmartZone, this cooktop delivers weekday to weekend versatility. Use it as separate zones or link them to create a larger surface, ideal for everything from delicate sauces to perfectly seared steaks.

- Finished in sleek black glass with durable detailing for a refined kitchen look
- Immediate heat response with precise temperature control for perfect results
- Pause and Recall let you resume cooking with your settings restored

- Touch&Slide controls make it easy to adjust each zone or link zones into a large SmartZone

## DIMENSIONS

|        |        |
|--------|--------|
| Height | 54 mm  |
| Width  | 900 mm |
| Depth  | 530 mm |

## FEATURES & BENEFITS

### Complementary design

Finished in subtle black glass with durable detailing, this cooktop complements your kitchen and pairs beautifully with Fisher & Paykel ovens for a cohesive look. Install flush for seamless flow, or raised to create a focal point.

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. © Fisher & Paykel Appliances Ltd 2020

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
