

# 7kg Series 5 Vented Dryer, Auto Sensing, Full Reverse Tumbling

Vented

Dry your clothes efficiently without over drying, with multiple ways to install and vent.

- Auto-sensing detects moisture level to prevent under or over drying
- Six fabric care cycles including Freshen, Heavy and Delicate
- Full reverse tumbling to help dry garments quicker and more evenly
- Drying rack for items that are too precious to tumble

## DIMENSIONS

|        |        |
|--------|--------|
| Height | 830 mm |
| Width  | 600 mm |
| Depth  | 575 mm |

## FEATURES & BENEFITS

- Auto-Sensing Technology**  
Auto-sensing prevents over-drying by sensing moisture levels inside the drum and shutting off automatically. This helps clothes last for longer and reduces energy consumption.
- Cares For Clothes**  
This dryer has a cycle to suit every type of load including Delicate, Heavy and Freshen. Select a cycle with the easy to use SmartTouch™ controls.
- Simple Installation**  
Vent out either the front or the back of this dryer. A wall mounting kit is included and the control panel can be inverted easily.
- Drying Rack**

This model comes with a drying rack, perfect for those items that are too precious to tumble.

**Reverse Tumbling**  
Reverse tumbling alternates direction to help garments move freely so they dry quicker and more evenly.

**Easy Loading**  
The robust dryer door features die cast metal hinges that open to a full 180° for easy access and loading.

## SPECIFICATIONS

|                                         |                  |

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
