FEATURES & BENEFITS

Combination cooking

Give every ingredient the respect it deserves with combination steam cooking. Using a fusion of dry convection heat with variable amounts of steam, you can easily retain the delicate texture of ingredients like salmon and snapper, the vitamins and minerals of greens, or the depth of flavour of a perfect cut of meat.

Mastery Of Temperature

Elevate your meals with the precise temperature and humidity control of steam cooking. Steam cooking has a gentler heat transfer into the food, so you get nutritious and delicious results that are moist and tender on the inside, crisp and flaky on the outside, all with minimal effort.

Preserve flavour and nutrients

Cooking with steam creates dishes that are full of flavour, while preserving all the vitamins, minerals and textures of delicate ingredients, like fish and seafood. With five steam-only cooking functions, including Sous vide, Steam and Steam Proof, you can use steam to create healthier dishes that get the best out of each component on the plate.

Multi-function flexibility

A truly multiple function oven where both steam-only and convection-only cooking mediums can stand on their own merits. You have the freedom to choose - whether it's dry heat or moist heat, or a combination of the two - each delivering different cooking results. Purchase our Wireless Temperature Sensor

accessory and precisely monitor cooking in real time (accessory sold separately).

Design freedom

This Contemporary style oven has a stylish black finish with stainless steel contrasts, designed to help you achieve a kitchen aesthetic that suits your design style. Pair with a Vacuum Seal Drawer for the ultimate kitchen solution.

Sized To Suit

This compact 60cm Steam Oven can be placed almost anywhere. All Companion products can be installed at a convenient height to suit your kitchen design and preference.

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
