### DISHWASHER DOOR PANEL INSTALLATION

①

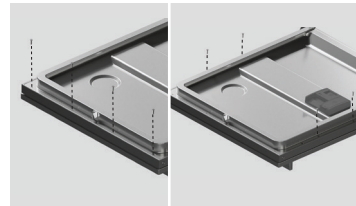

Install handle as per handle installation guidance.

②

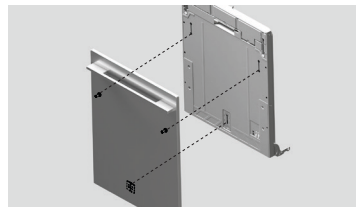

Secure the sliding bracket and top as shown with 4 x 13mm screws.  
Ensure ratchet is correctly oriented, allowing the door to be adjusted freely.

③

Remove the four screws along the top of the inner door.  
Remove the four screws on the sides of the inner door.

④

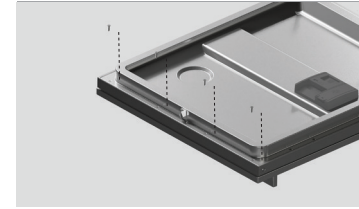

Hang door panel.

⑤

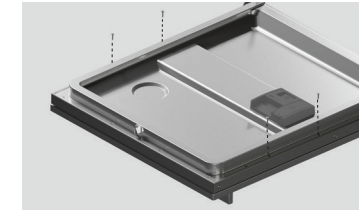

Align door panel by sliding the accessory door until the top of the door panel sits above the top of the control panel.

⑥

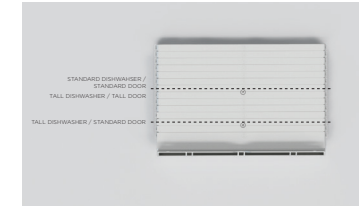

Secure door panel by replacing 4 screws along the top edge of inner door with M3 x 31mm screws.

⑦

Secure door panel by replacing 4 screws along the sides with 3.9 x 38mm screws.

⑧

Cut the exit vent as shown.  
A tall product with a standard size door panel should be cut at line 2.  
All other configurations can be cut at line 7.

⑨

Slot the exit vent into the product and secure using two 3.5 x 11mm screws.

⑩

Check door balance. Refer to installation guide for details.
