- Bottom freezer drawer
- EZKleen anti-fingerprint coating

DIMENSIONS

Height	70 3/4 "
Width	35 7/16 "
Depth	27 3/8 "

FEATURES & BENEFITS

- Activesmart™ Foodcare**
ActiveSmart™ technology understands that the refrigerator door is the most opened in the house. It constantly adjust temperature, airflow and humidity, maintaining an optimum environment and helping keep food fresher for longer.
- Clever Energy**
Your refrigerator adapts to daily use by cooling and defrosting only when needed. This means your refrigerator uses the energy it needs without compromising on food care.
- Easy Cleaning**
Spill-safe secure glass shelves easily capture any drips or leaks and prevent them from falling on items below.
- Design Quality**

- Our refrigerators are designed and built using quality materials. We use real stainless steel on our refrigerators and solid glass for shelving.
- Humidity Control**
Your fruit and veges need different environments. The humidity control slides in each storage bin create a microclimate that helps keep food fresher for longer.
- Ice Maker**
The internal ice maker delivers fresh ice to a dedicated freezer bin. Simply turn it off to free up freezer space or during busy times boost ice production by up to 30%.
- Ultra Slim Water Dispenser**
The slimline water dispenser is easy to use. The angled water delivery means that almost any size or shape of vessel can be filled, while taking up no storage space in the door.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
