# 60cm Series 7 4 Zone Induction Cooktop, 2 SmartZones

Series 7 | Minimal

Grey Glass

Featuring powerful induction technology and two flexible SmartZones, this cooktop offers weekday to weekend versatility. Cook in each zone individually or link them to create a larger surface, ideal for everything from delicate sauces to perfectly seared steaks.

- Choose from black or grey finishes to complement your kitchen design
- Immediate heat response with precise temperature control for perfect results
- Pause and Recall let you resume cooking with your settings restored
- Touch&Slide controls make it easy to adjust each zone or link zones into two large SmartZones

## DIMENSIONS

| | |
|---|---|
| Height | 54 mm |
| Width | 600 mm |
| Depth | 530 mm |

## FEATURES & BENEFITS

### Complementary design

Available in grey or black finishes, this cooktop complements your kitchen and pairs beautifully with Fisher & Paykel ovens for a cohesive look. Choose a flush fit for a seamless flow between surfaces or a raised installation to create a refined focal point.

### Large, flexible cooking area

SmartZone links two cooking zones and controls them as one, giving you the versatility to use wide pans or griddles. Effortlessly cook larger dishes, from a whole fish to pancakes to a perfectly seared steak, all without compromising on performance.

### Instant response

Go from boil to simmer in seconds for precise, effortless cooking. Touch&Slide controls respond instantly to your adjustments, helping you stay in control and save time in the kitchen.

### Fast heat, consistent results

Enjoy the instant responsiveness of induction cooking, from quick temperature changes to frying crispy chicken or searing steak. PowerBoost delivers intense heat in seconds, while precise control ensures consistent results across every cooking technique.

### Enhanced features

Gentle Heat functions deliver low, consistent warmth for precision cooking. Perfect for melting chocolate, creating delicate sauces, gently poaching fish, or keeping dishes warm without overcooking.

### Superior efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

### Effortless control

Pause and Recall functions give you complete control. Pause cooking for up to 10 minutes, then resume with a tap as heating is temporarily stopped. If the cooktop is turned off, Recall instantly restores your settings so you can continue cooking without interruption.

### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
