8kg Series 5 Condensing Dryer, Auto-Sensing, Rack Dry

Series 5 | Condensing

White

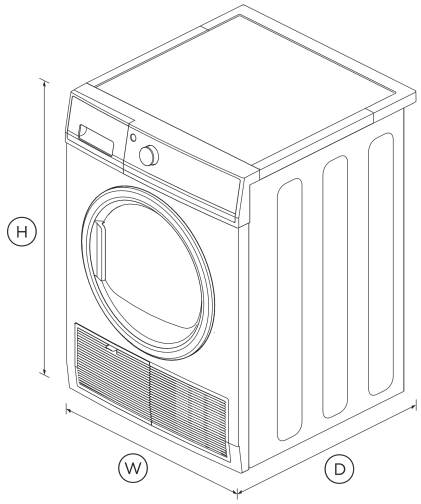

With no need to vent moisture outside your condensing dryer can be incorporated into any laundry design, for a beautiful laundry.

- 11 drying cycles including Delicate, Easy Iron and Rack Dry
- Auto-sensing detects moisture levels to prevent under or over drying
- No need for external venting, allowing your dryer to be placed anywhere in your home

DIMENSIONS

Height	850 mm
Width	600 mm
Depth	645 mm

FEATURES & BENEFITS

Healthier Drying

Condensing technology drains water from the dryer into a tank. This reduces moisture and allergens released into your laundry compared with a front venting dryer. A healthier choice for allergy sufferers.

Ease Of Use

This dryer has a cycle to suit every type of load including Delicate, Heavy and Freshen. Select a cycle with the easy-to-use SmartTouch™ control dial.

Drying Rack

This model comes with a drying rack, perfect for those items that are too precious to tumble.

Cares For Clothes

Auto-sensing prevents over-drying by sensing moisture levels inside the drum and shutting off automatically. This helps clothes last for longer and reduces energy consumption.

Drum Light

A handy interior light turns on when you open the dryer door, providing improved visibility inside the drum.

Perfect Pair

Fisher & Paykel washing machines and dryers are designed to match and look stylish together in your laundry, and can be stacked to offer you more storage space.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
