

Gas on Glass Hob, 60cm, LPG

Series 9 | Minimal

Black Glass | LPG

A powerful four burner with precision control and performance. Pair with any other appliance in our Minimal range.

- Four burners including wok burner and two semi rapid burners
- A timeless, minimal look to fit any kitchen style, with black ceramic glass cooking zones and a black trim
- A flame-failure safety device; if the flame goes out, the gas turns off
- Removable cast iron trivets and ceramic glass that can be wiped down for easy cleaning

DIMENSIONS

Height	58mm
Width	600mm
Depth	530mm

FEATURES & BENEFITS

Complementary design

The subtle black glass, anodised trim, and black dials blend elegance with durability and are designed to match the Minimal style Series 9 ovens. With premium styling and detailing, these hobs seamlessly blend with other appliances for a cohesive, considered kitchen design.

Precise Control

Precise temperature control at both low and high temperatures. Different burner sizes fit a variety of pots to complement different cooking styles.

Easy Cleaning

Cleaning and care of these hobs is easy with sealed burners and a single sheet cooking surface. After each use, simply remove the trivets and wipe down the glass.

Quality Materials

Featuring cast iron trivets, anodised metal dials, and high-temperature resistant ceramic glass, our hobs are built with the finest materials for optimal performance.

Safe & Sound

The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel

products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
