

# 13cm Series 11 Modular Auxiliary Downdraft Extractor

Minimal

With powerful extraction, this ventilation module fits seamlessly into your benchtop. Combine with our Primary Induction Hob and other modular hobs for the ultimate culinary solution.

- Part of our unique modular cooking solution. Pair with a primary hob for a unified cooking experience
- Seamless kitchen integration, without the need for overhead ventilation
- Links to adjacent hob modules, with automatic extraction at the right speed to suit your cooking
- With five fan speeds and a boost function for effective removal of odours and steam

## DIMENSIONS

Height	186 mm
Width	130 mm
Depth	530 mm

## FEATURES & BENEFITS

### Modular Design Freedom

Enhance your cooking space with downdraft ventilation. These modules can be discreetly positioned alongside your primary cooktop and auxiliary modules, ensuring a fresh environment regardless of your chosen cooking method. Tailor your setup to reflect the way you live, cook, and entertain.

### Sleek And Subtle

Redefine your kitchen's aesthetic with the downdraft ventilation module. Seamlessly integrated into the countertop and alongside hob modules, it allows for an open-style, social kitchen. Choose from elegant black glass or subtle grey glass finishes that complement your kitchen's design.

### Design Versatility

Ideal for layouts where traditional overhead hoods pose challenges, this ventilation module pairs beautifully with island hobs and open kitchens. Its ability to retract or hide ensures a cleaner, more open appearance, enhancing your kitchen's functionality and design.

### Intuitive Extraction

Simply open the cover and enjoy convenient extraction with Link Mode. The fan intuitively activates, adjusting its speed according to the power levels of nearby hob zones, eliminating the need for manual adjustments. Even after you have finished cooking, the fan remains active to capture any remaining vapours.

### Quiet Efficiency

The auxiliary ventilation module operates efficiently and discreetly in the background, seamlessly controlled via the primary module touchscreen. With five fan speeds plus a boost function, it quickly removes steam, odours, and grease.

### Prolonged Freshness

A Delayed Off timer ensures that cooking smells continue to be extracted even after you've finished cooking. Additionally, the timer will automatically shut off the ventilation after a preset time, reducing energy waste if you forget to turn it off.

### Easy To Clean

The nine-layer filter effectively traps grease particles during extraction. Designed for simple removal, the filters are easy to clean and dishwasher safe.

## SPECIFICATIONS

Consumption	
Energy rating	B
Energy usage	79kWh/year
Fan ratings	
Maximum air movement	519 m <sup>3</sup> /hr
Maximum sound rating	78 dBA
Speed 1 sound rating	42 dBA
Installation and cleaning	
Air outlet size	300 x 70 mm
Dishwasher safe filters	1
Recirculation	Optional
Stainless steel filter cover	•
Performance	
Extraction type	Surface
Fan speeds	5 + Boost
Fan speeds + boost	•
Filter type	Mesh with Stainless Steel filter cover
Number of filters	1
Power requirements	
Supply frequency	50 Hz
Supply voltage	220-240 V

Total Power	167 W

#### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
