Series 7 Contemporary Dishwasher

Series 7 | Contemporary

Stainless Steel

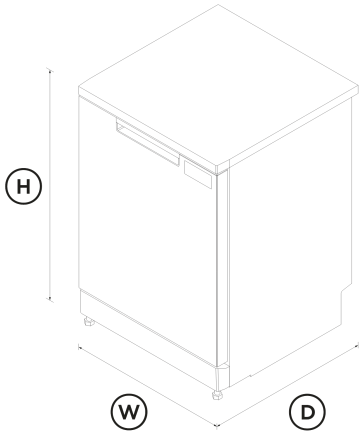

Designed to adapt to every load, this 42dbA rated dishwasher combines a Triple Wash System, Auto Cycle sensing and AutoDry+ technology to deliver precise cleaning and drying performance. Variable wash pressure, independent spray arms and flexible loading features, including stemware grippers and adjustable tines, provide exceptional care for everything from delicate glassware to heavily soiled cookware.

- Quiet 42dBA noise rating, ideal for open plan kitchens
- AutoDry+ automatically opens the door and a fan circulates air at the end of a cycle for better drying
- Flexible racking and Triple Wash System for perfect results in every wash
- Connect via Wi-Fi and the SmartHQ™ app for remote control and notifications
- For added peace of mind, Aqua Stop automatically shuts off the water if a leak is detected

DIMENSIONS

Height	850 - 895 mm
Width	597 mm
Depth	600 mm

FEATURES & BENEFITS

80 Years of Clean Dishes

We have spent 80 years obsessing over the science of clean dishes, meticulously calibrating time, temperature, water movement and chemistry to deliver perfect results. That expertise is what powers Auto Cycle, which uses sensors to detect how dirty the load is, intelligently adjusting wash conditions for consistent cleaning performance and efficient use of resources, wash after wash.

Engineered for Life

Trust is earned over time through consistent results. That's why our team of scientists test wash performance using over 100,000 pieces of cutlery and crockery each year. By carefully analysing soil removal, water and energy consumption, we continuously refine our cycles to deliver proven consistency, wash after wash, transforming dishwashing routines into rituals.

Triple Wash System

The rule of thirds is a principle of balance in design, where three elements work together to create harmony. Inspired by this, our Triple Wash System brings together three racks, three independent spray arms and three-stage filtration to work harmoniously inside the dishwasher. With balanced coverage across every level, the result is consistent cleaning performance in every load.

Ultimate Flexibility

No two days in the kitchen are the same, so your dishwasher should adapt with ease. A flexible cutlery tray keeps utensils neatly separated, while the height-adjustable middle basket creates extra room for tall dishes or bulky cookware. Cup racks with stemware grippers help protect delicate glassware, and foldable supports create the flexibility to accommodate everything from deep pots to oven trays.

Quiet and Considered

Open-plan kitchens call for appliances that work quietly and beautifully. With a very low 42dBA noise rating, this dishwasher is designed to operate with minimal noise and not disrupt your household. For better visibility when loading or unloading, internal LED lighting provides gentle illumination inside, making contents easy to see at a glance.

Custom Cycle Selection

Each load requires a delicate balance. Variable wash pressure and independent spray arms work together to deliver targeted cleaning performance, adapting water flow and force to suit everything from delicate glassware to heavily soiled cookware. Intensive, Half Load, Sanitise and Dry+ modifiers allow each cycle to be further refined for precise cleaning and drying results across every load.

Exceptional Drying Performance

Clean dishes are the result of more than just the wash, with drying a crucial final step in the process. AutoDry+ automatically opens the door and uses a fan to circulate air at the end of the cycle, releasing steam to support more effective drying with minimal energy use. Delivering dishes that are clean, dry, and ready to be put away.

Connect and Control

Designed to work beyond the kitchen, this dishwasher can be controlled through WiFi using the SmartHQ™ app. Start cycles, monitor progress and receive notifications on the go, keeping everything moving quietly in the background.

SPECIFICATIONS

Accessories (included)

Cutlery basket	•

Capacity and loading

Accommodates round plates up to (lower basket)	320mm
Accommodates round plates up to (top basket)	200mm (with cutlery tray)
Adjustable height, foldable cupracks	•
Easy lift adjustable upper basket	•
Fold down tines	•
Full width cutlery/utensil tray	•
Large crockery insert in lower basket	•
Place settings	15
Wine glass supports with stemware grippers	•

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. © Fisher & Paykel Appliances Ltd 2020

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
