- Pair cook zones to create one large SmartZone for cooking flexibility
- Elevated design offers a sleek, modern look that enhances your kitchen's aesthetic

DIMENSIONS

Height	61 mm
Width	300 mm
Depth	530 mm

FEATURES & BENEFITS

Link Mode compatability

Use Link Mode to automatically activate your compatible rangehood as you cook, creating an intuitive, hands-free experience in the kitchen.

Guided setup with SmartHQ™

SmartHQ™ provides step-by-step onboarding, helpful tips and setup guidance — right from your phone. Designed to support you beyond installation, the app helps you get familiar with your cooktop and explore its features at your own pace.

Enhanced features

PowerBoost and GentleHeat deliver precise temperature control — from intense heat for searing meat to low, steady warmth for melting chocolate. An integrated timer helps you stay on track.

Elevated design

A sleek black glass surface, refined detailing, and an updated user interface combine to deliver a cooktop that looks as good as it performs. Designed for seamless integration, it brings a modern, intuitive touch to everyday cooking.

Precise control

Fisher & Paykel induction cooktops respond instantly to changes in temperature, giving you precise control for everything from fast searing and sautéing to delicate tasks like melting or tempering.

Easy cleaning

Induction heats the cookware, not the surrounding surface, so spills are less likely to bake on. The durable ceramic glass cleans easily with a simple wipe after cooking.

Safer choice

Induction cooktops heat only when cookware is detected on the ceramic surface. Features like keylock, safety timeout, hot surface indicators, and auto switch-off in case of spills help ensure a safer cooking environment for everyone.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
