QUICK REFERENCE GUIDE > OR90SCG1LX1

Freestanding Cooker, Dual Fuel, 90cm, 5 Burners

Series 5 | Classic

Stainless Steel

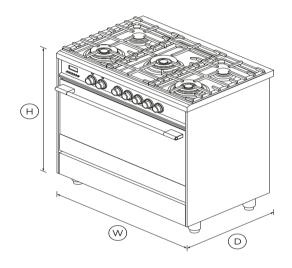

Get the best of both worlds with dual fuel. A gas cooktop with wok burner is paired with a seven-function convection oven.

- Five burner gas cooktop, with precise heat control
- Convection oven with 140L total capacity and seven oven functions
- Optional non-tip full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height 898 - 946mm
Width 897mm
Depth 600mm

FEATURES & BENEFITS

Quality and durability

Every detail has been carefully crafted, from the solid balanced door to the durable cooktop trivets and large capacity oven.

Impressive Capacity

With an extra large 140L capacity, this range has plenty of space for cooking multiple dishes at the same time.

Burner Power & Control

Instant and immediate control from the highest to the gentlest

heat. The finely tuned cooktop controls let you sear and stir fry over powerful heat, or simmer a delicate sauce to perfection.

Even Heat

Dishes on the top shelf turn out as perfectly as the ones on the bottom, due to our AeroTech™ convection system that circulates air evenly throughout the entire oven.

Easy To Clean

Your cooktop simply needs a quick wipe to keep it looking good as new, as the gas cooktop is made from a single piece of stainless steel that contains spills. The oven door, its inner pane of glass and runners can also be removed for easy cleaning.

Safe And Sound

The door and cavity cooling system keeps the heat on the inside, protecting your hands and surrounding cabinetry. The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

SPECIFICATIONS

Accessories	
Chromed shelf runners	1 set
Flat wire shelf	1
Full extension sliding shelves	1 set
Roasting dish	1
Small pot support	1 (part 533981)

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
