

91cm Series 11 Integrated French Door Refrigerator Freezer, Ice & Water

Integrated

Experience the pinnacle of refrigeration design with our most advanced model. Featuring an elegant interior, this refrigerator embodies premium functionality and style. Designed to optimise energy efficiency, it includes an ice maker and internal water dispenser.

- Variable Temperature Drawer with Chill, Fridge, and Pantry modes for optimal food care
- With a premium interior for a refined look and feel, this model is the highlight of our Integrated collection
- Enjoy fresh, chilled water and ice from the internal water dispenser and ice maker

- Space-saving French Door design, ideal for island or galley-style kitchens

DIMENSIONS

Height	2134 mm
Width	908 mm
Depth	610 mm

FEATURES & BENEFITS

- Variable temperature drawer**
When it comes to food preservation, one temperature doesn't fit all. The Variable Temperature Drawer gives you complete control, letting you switch the bottom refrigerator drawer between Chill, Fridge, or Pantry modes at the touch of a button. Use it for everyday convenience, or increase chilling capacity when hosting and entertaining.
- Clever energy**

Highly efficient vacuum insulation reduces heat transfer, helping the refrigerator use less energy while keeping your food fresher for longer.

Elegant interior
With a premium interior and refined detailing, this model is the highlight of our Integrated refrigeration collection, bringing together exceptional design and everyday functionality.

Internal water and ice dispenser
The internal water dispenser and ice maker preserve a seamless exterior that blends effortlessly with surrounding cabinetry. Inside, the slimline dispenser is flush-fit to maximise storage, with a temperature-controlled flow and angled design to help catch drips and spills.

ActiveSmart™ Foodcare
ActiveSmart™ Foodcare adapts to your lifestyle. This technology understands how you use your fridge and adjusts the temperature, airflow, and humidity to keep your food fresher for longer.

Seamless integration
These models sit flush, with 3mm gaps and no visible hinges or grilles. The French Door format features smaller doors that maximise space and movement, making it ideal for island and galley kitchens. Integrated models can be hidden behind cabinetry or paired with a stainless steel door panel.

Design quality
The premium design includes a steel interior lining, full-extension metal shelf runners for easy access, robust glass shelving, and drawers with quality hinges designed for everyday use.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
